Proudly Manufactured in Great Britain

Our History

In 1986, Elite Office Furniture began production in Howden, East Yorkshire. Two years later production moved to larger premises in Goole, East Yorkshire with a workforce of 12.

The business has seen progressive growth over the last 37 years, now standing as a multi-million-pound business, occupying 244,254 sq ft of manufacturing space and employing 150 people.

Our people are at the heart of everything we do, with the current workforce still bearing the original staff and factory operatives that started with the company all them years ago.

Our Future

Strategic decisions being made now are pathing the way for further success at Elite.

Our new manufacturing facility sustains future production and allows us to develop within the industry, not only as a major competitor, but one with strong credentials to minimising the effect of manufacturing on the environment.

Because of our investment, we believe the future at Elite going to be exciting, a journey we want you to be a part of.

Standards

Furniture, Acoustic Screen, Dividing Screen and Seating Accreditations

Furniture Accreditations

BS EN 527-1:2011
Office furniture desking dimensions.

BS EN 527-2:2002
Office furniture desking mechanical safety requirements.

BS EN 527-3:2003
Office furniture desking strength and stability.

BS EN ISO 9241-5:1999
Ergonomics of VDU/TFT screen usage within offices.

BS 4875-7:2006
Strength and stability of shelving.
Test level 4 (shelves only).

BS 6396:2008 + A1:2015
Office furniture desking electrical systems.

BS EN 13722:2004
Gloss/reflective level testing on furniture surfaces.

BS EN 14073-2:2004
Strength and rigidity testing of storage furniture part 2.

BS EN 14073-3:2004
Strength and rigidity testing of storage furniture part 3.

BS EN 14074:2004
Endurance and stability testing of storage furniture.

BS EN 15372:2008 level 2
Standard and folding tables structurally suitable and stable for general contract use.

BS EN 14323:2004
Dual Board resistance to scratching, cracking and staining.

Acoustic Screen Accreditations

BS EN ISO 354:2003
Measurement of sound absorption in a reverberation room.

ISO 11654:1997
Sound absorbers for use in buildings - Rating of sound absorption.

ISO 9613-2:1996
Attenuation of sound during propagation outdoors.

ISO 9613-1:1993
Calculation of the absorption of sound by the atmosphere.

BS EN 12667:2001
Thermal Conductivity / Resistance Performance.

BS EN 13501-1:2007 +A1:2009
Fire Classification Of Construction Products Building Elements.

BS EN 13823:2010 + A1:2014
Reaction to Fire Tests. Thermal attack by single burning item.

BS EN ISO 11925-2:2010
Reaction to Fire Tests. Ignitability of building products subjected to direct impregnation of flame - part 2 Single-flame source test.

Dividing Screen Accreditations

BS 476-7:1987
Flammability test for Screens (Class 2).

BS EN 1023-1:1997
Office furniture screens, dimensions.

BS EN 1023-2:2000
Office furniture screens, mechanical safety requirements.

BS EN 1023-3:2000
Office furniture screens, test methods.

Seating Accreditations

BS EN 1022:2005
Seating, determination of stability.

BS EN 1335-1 + BS EN 1335-2 + BS EN 1335-3
Office work chairs safety test methods.

BS EN 1728:2012 + AC:2013
Seat and Back Static Load Test and Durability.
Front and Back Fatigue Test and Impact Test.

BS EN 5459-2: 2000+A2:2008
Office seating for use by person weighing up to 150kg and for use up-to 24 hours a day.

BS EN 13761:2002
Visitor Chairs - Dimensions and Safety Requirements.

BS EN 15373:2007 level 2
Seating strength, durability and safety.
Requirements for non-domestic seating.

BS EN 16139:2013
4 Legged and cantilever seating, strength, durability and safety requirements.

BS EN 10025:1993
Specification for hot rolled products of non-alloy structural steels and their technical delivery conditions.
Applicable to all chrome plated parts.

ANSI/BIFMA X5.1-2011
International testing certificate for office chairs.
Sections:05,11.3,13,14 and 15.

TUV Eco-Circle 2008
Tested for recyclable content, harmful substances, energy saving and ergonomic design.

NEOCON
Silver Award Winner 2013 Chicago, USA.

Services

Design Services and Chair in a Box

Design Services

At the heart of Elite lies our design and marketing department that over twenty years has grown from one to seven members. The workplace is continuously evolving, with new concepts and studies shaping the way we design the environment. Our most effective way of maintaining focus on current workplace trends is through attendance at trade shows and exhibitions where we have the opportunity to meet designers and industry influencers who are selected as key-speakers, often covering pressing industry topics.

The design team delivers a breadth of varied services from 2D spacial planning to realistic 3D computer generated visuals. Whether space permits large volumes of staffing or space is an issue, the team will offer successful and practical solutions that take advantage of the available space.

Each project is carefully analysed to achieve the very best layout and conformability to your requirements, complying to current health and safety laws and guidelines. 3D design is now a well-established practice in office design and provides the best method of illustrating office layout designs. We are working to industry standard BIM level 2, that involves developing building information in a collaborative 3D environment with data attached.

For your convenience, all available CAD and Revit Blocks, Product Thumbnails and Assembly Instructions are available at: **https://www.elite-furniture.co.uk/project/downloads/**

AUTOCAD AUTODESK REVIT AUTODESK® INVENTOR® SketchUp 3DS MAX

Chair in a Box

Elite offer two different 'boxed' seating delivery options. Delivery cost is dependant on the option you choose, please see below the two options that are available including the code required for when placing your order. For compatibility, please refer to the bottom of each product page.

Option 1: Elite Delivery

Chairs boxed at the factory and delivered using the standard Elite transport method to your nominated address.
Delivery based on weekday multi drop vehicles / untimed delivery.

When ordering please suffix the chair code with /BOX1.

Option 2: Courier Delivery

Chairs boxed and shipped using a courier service to your requested UK mainland address. In these instances where speed and convenience is of the essence, chairs can be dispatched within 24 hours post manufacture. No guarantee can be made regarding the exact time of delivery. 9am - 5pm is standard.

Chairs delivered by courier are dispatched in a box 1000mm high (maximum). Please expect some models to be delivered in KD format in order to comply with the couriers tolerance height for shipping. In these instances it may be the case that minimal assembly is required on arrival.

Delivery time is 24-48 hours upon collection by the courier.

When ordering please suffix the chair code with /BOX2.

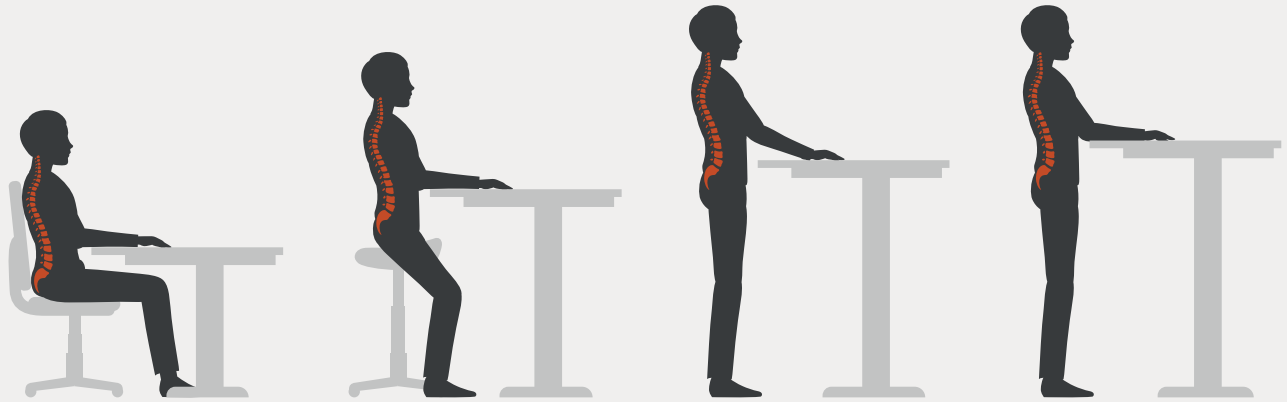
Ergonomics

Overview and Guidelines

Ergonomics Overview

Ergonomics is an applied science that aims to understand people physically and psychologically, in order to design and arrange products, environments and processes for human interaction in the most safe and efficient ways.

Sitting with the correct posture is crucial for maintaining good health, allowing bones and joints to align, decreasing the abnormal wearing of joints that could cause joint pain or even degenerative arthritis. It also reduces stress on the ligaments holding spinal joints together, minimizing the likelihood of injury. There are increasing reports of musculoskeletal disorders caused by poor workstation set ups, poor posture, repetitive movements, intensive work and infrequent breaks.



A good posture allows muscles to work more efficiently, allowing the body to use less energy and therefore, preventing muscle fatigue. It helps prevent muscle strain, overuse disorders and even back and muscular pain. Taking care of your posture will maximise comfort, safety and performance, allowing you to focus on what's important.

Chairs that have given consideration for ergonomics have a multitude of advantages. As well as correctly supporting the users posture, they provide supreme comfort with headrests, preventing neck problems and the inclusion of a cushioned seat pad as opposed to a hard seat reduces the pressure on the hips.

The diagram below illustrates the recommended natural posture, demonstrating less stress on the body, reducing the chances of harm and injury to the individual. The ergonomic chair ensures appropriate alignment of the body including the eyes, head, neck, shoulders, arms, back, knees and feet all in relation to the desk and computer screen.

Posture Guidelines

1. Maintain a distance between eyes and screen of 500mm to 700mm.
2. Keep your shoulders relaxed and not raised.
3. Keep your forearms horizontal and elbows bent at an angle slightly in excess of 90°.
4. Maintain a distance between knees and desk of 80 to 100mm.
5. Avoid pressure to the area behind the knees.
6. Keep your legs bent at an angle of between 90° to 120°.
7. Keep your feet resting on the floor.
8. Let the backrest support your back.
9. Sit firmly against the back with a small gap between the front of the seat pad and the back of your knees.

Mix

Task and Meeting Seating

The Mix task chair offers clean lines and simple aesthetics at the very heart of its design. A height adjustable, breathable mesh back and lumbar support delivers supreme comfort whilst the synchronised, self-weighing mechanism responds to the user's bodyweight and automatically adjusts the tension of the back tilt. All of this ensures optimal balance and posture for the user. With the choice of a white or black frame and a choice of 27 mesh finishes, it offers maximum personalisation. In summary, Mix is a superior, versatile and ergonomic task chair at an affordable price.

Match

Task and Meeting Seating

Match provides a refined task chair at an affordable price. Designed with functionality in mind, Match uses an intuitive self-weighing mechanism to control the seat inclination to maintain a balanced posture for the user. This mechanism reacts to the user's bodyweight and automatically adjusts the tension of the back tilt. Working in perfect harmony with this breakthrough technology is a fully upholstered, height adjustable back with optional headrest that provides the user with excellent comfort and support. The Match family comprises of upholstered task, draughtsman and cantilever meeting chairs, providing a comprehensive range.

Loop

Task and Meeting Seating

The Loop chair is characterised by sharp, clean lines, well-balance proportions and functionality. The main concept is a combination of breathable mesh backrest and a soft upholstered lumbar pad presented in a new and innovative way. This combination not only creates an ergonomically pleasing and extremely comfortable seating experience, but also expounds the uniquely modern styling design of the chair. Refined lines, soft curves and an elegant silhouette all make ‘Loop’ a perfect addition to any modern environment.

Eden

Operator Seating

Eden offers a fresh stylish approach to classic operator seating with its smooth curved lines and sculptured back elevating its appeal to new levels. The comfortable ergonomically shaped seat and backrest are complemented by clever design features including a hidden button incorporated into the seat shroud to operate the chairs height adjustment on the standard PCB model. Eden offers integrated ‘step by step’ backrest height adjustment as standard across the entire range, thus, allowing all users to find the setting most comfortable for them. Within the complement of options are a pump-up lumbar support, integrated seat slide, polished base, four different arms and a fully synchronised mechanism upgrade offering increased comfort and a higher level of ergonomic control. The Eden chair can be specified in either a classic black shell or a stunning crisp modern white finish.

Team Plus

Operator and Meeting Seating

Team Plus is a classic product, with a distinct focus on operability. Its understated style disguises the fundamental strength and flexibility of the chair. The contoured seat and backrest incorporate an injected polyurethane foam, for ultimate comfort. A robust 2-lever mechanism is supplied as standard with the functionality to adjust the height of the seat and the angle of the backrest. The angle of the seat can be adjusted when specifying one of the two, optional, 3-lever mechanisms available, with the heavy-duty version delivering a compliant solution for use up to 24 hours a day. Further options include a pump-up lumbar support, seat slide, polished base and a variety of armrests. A versatile seating range which can be tailored to meet your exact requirements.

Breeze

Agile Seating

Adapting the modern office to be an agile work environment has become a must for many businesses. Increased overheads, more diverse staff requirements and the need for flexible shared space are major drivers of this trend. Breeze has been designed in response to these demands, where flexibility and agility are essential elements of furniture design. The back frame's smooth contours provide a comfortable and supportive posture with generous proportions. Breeze features a central balance point that adjusts through the users natural movement. A highly engineered, breathable mesh is an integral component offering an enhanced vertical and lateral lumbar support moulding to each users body shape. The breeze chair offers operational simplicity and functionality making it suitable for multiple applications and is ideal as a work or conference chair, or as a chair for meeting rooms, touch down points and collaborative environments.

Breeze

Agile Seating

Agile: Designed by Norbert Geelen - **Breathable black mesh back as standard** - Black or grey plastic shell finishes - Generous seat pad
Central balance point with 12° backward tilt and 5° forward tilt - Integrated height adjustment - **Black nylon or grey nylon five-star base as standard**

Certifications: BS EN 1335-1:2000/AC:2002 (Type C) - BS EN 1335-2:2009 - BS EN 1335-3:2009/AC:2009

Tempo

Agile Seating

Agile working environments are the culmination of collaborative spaces where employees function with greater efficiency. Our seating range offers a collection of solutions that support this emerging trend. Designed with the intention of being different, Tempo combines sophistication and comfort to deliver an elegant chair with a refined profile. The sculpted body is teamed with a mesh back and tilt mechanism for the highest levels of comfort. The integrated PU structure which is cleverly incorporated into the lead edge of the waterfall seat and the subtly integrated mechanism incorporated in the underbody of the chair, offers users complete comfort and the adjustability necessary to achieve the correct posture when seated.

Infinity

Agile Seating

Infinity is a comprehensive range offering multi-purpose seating with three base options making it a suitable solution for agile environments, meeting rooms, breakout spaces, classrooms and waiting areas. The polypropylene shell, available in black or white with integrated support arms, can be finished with an upholstered seat back and pad or mesh back with upholstered seat pad. To complement the polypropylene surround, metalwork is supplied in black graphite or white as standard or an enhanced aesthetic can be achieved with the introduction of colour, using one of our 11 epoxy-powder coating colour options.

Ace

Agile Seating

The rapid evolution of the ‘agile office’ is primarily centred around creating flexible environments for employees to carry out activity based working in adaptable space as opposed to from dedicated workstations. The Ace chair has been designed by Claudio Bellini to fit perfectly into the modern workplace landscape. The chair is inspired by a graceful design that follows an endless loop, creating a unique visual alliance between the upholstery and the single shell frame. The open lumbar area and flexible back supports users, providing relaxed comfort when seated. Purposefully designed with agility and flexibility in mind the Ace range offers a variety of leg frames and configurations to provide the perfect solution for multiple applications.

Leola

Agile Seating

Changes to workplace landscapes have accelerated as employers strive to provide their staff with flexible alternatives to conventional workstations. This is best achieved by adopting an agile work environment which focuses on optimising the use of space. The introduction of comfortable, modern, functional furniture aimed at encouraging collaboration and creativity is an obvious solution. The striking design of Leola is compounded by its versatility as a multifunctional chair. The numerous options available including integrated arms, backrest finishes and a choice of upholstered seat and back across three different shell finishes demonstrate the diversity of this range. Leola is perfect for multifunctional environments with proven performance in community areas, training facilities, conference environments, touch down areas and many other applications in the office, education and leisure environments.

Salto

Agile Seating

As workspaces evolve, there has been a transition toward agile working. This new concept focusses on flexible environments optimised for collaborating in shared spaces. Designed in Italy by Paolo Scagnellato and Jeremiah Ferrarese, Salto was created with flexibility in mind and the concept of designing a simple, yet attractive chair that offers a technical solution for a multitude of applications. The versatility of the components allows Salto to be adapted for use in a variety of environments including, office, meeting and work spaces.

Castor Options

There are different types of castors, each designed for a specific purpose and performance. To get the best performance from your chair it is important to match the correct type of castor to the flooring in your office. The chairs movement depends on how much traction there is between the castors and the floor. The wrong type of castors can make it harder to move the chair around leading to greater stress on the back and leg muscles. Conversely the wrong castor may move too easily allowing the chair to roll away when the user stands up. This is a safety hazard if the user doesn't realise the chair has moved away when they attempt to sit down. In addition to the ergonomic and safety risks, the wrong type of castor can also damage the flooring. For this reason there are a number of different types of castor available to suit all requirements.

Castor Options

Hard Wheeled Castors

Fitted as Standard
Code: HWC

Supplied as standard, this type of castor is often referred to as a carpet castor as it is perfect for use on carpeted surfaces. The hard outside of the wheels move smoothly over most types of carpet and as the vast majority of office chairs are used on carpeted surfaces, this has become the most popular option. Please note, using these castors on other surfaces can be unpredictable. They have a tendency to slide rather than roll on hard surfaces such as wood and tiled flooring making them prone to scratching the surface. In addition, this creates very little friction making it difficult to control which can be dangerous for the user.

Soft Wheeled Castors

Code: SWC

Soft wheeled castors have a thin layer of softer material over the hard core. This material may be vinyl, soft rubber or polyurethane. Soft castors are recommended for hard floors (wood, vinyl, concrete and tiles). The composition of the outer wheel provides more friction with hard floors giving the right resistance, ensuring greater control to the user. In addition, they are less likely to scratch the floor.

Brake Loaded Castors

Code: BLC

These types of castors are designed for use on hard, vinyl, epoxy, wooden or concrete floors to reduce slipping. Brake loaded castors only brake when the user is sitting on the chair. This gives the user greater control of the chair allowing no movement whilst seated.

Brake Unloaded Castors

Code: BUC

This type of castor is also designed for use on hard, vinyl, epoxy, wooden or concrete floors to reduce slipping. Brake unloaded castors only brake when no one is sitting in the chair, making them ideal when the chair is required to be mobile when the user is seated, but remain in a stationary position when not being used. This type of castor can also help to prevent accidents caused by undesired movement of the chair on hard surfaces whilst trying to sit down in the chair.

i-sit

Meeting Chairs

The complete i-sit family is based on a modular principle that focuses on the use of a universal frame, avoiding the need for multiple components. The modular concept allows the entire product range to follow a clear design line and offers users the ability to select a harmonious configuration to suit their needs. i-sit uniquely combines design and innovation in an affordable package making it perfect for all markets and organisations.

Moda

Meeting Chairs

Moda has established itself as a core product within our seating portfolio. Available in four configurations, the range has been designed to complement our task chair offering, where compatibility between work areas is required. Appearance and flexibility are the design foundations of Moda with its clean, modern lines, superb detailing and robust construction all finished in a sleek chrome frame. The contoured back and seat support the body, providing excellent comfort for prolonged periods of sitting. Moda is an excellent choice for meeting and visitor chairs.

Infinity

Meeting Chairs

Infinity is a comprehensive range offering multi-purpose seating with six base options making it a suitable solution for agile environments, meeting rooms, breakout spaces, classrooms and waiting areas. The polypropylene shell, available in black or white with integrated support arms, can be finished with an upholstered seat back and pad or mesh back with upholstered seat pad. To complement the polypropylene surround, metalwork is supplied in black graphite or white as standard or an enhanced aesthetic can be achieved with the introduction of colour, using one of our 11 epoxy-powder coating colour options.

Ace

Multi-Purpose Seating

Designed by Claudio Bellini, the Ace chair is inspired by a graceful design that follows an endless loop, creating a unique visual alliance between the upholstery and single-shell frame. The open lumbar area and flexible back supports users, providing relaxed comfort when seated. Designed for the modern environment, Ace is adaptable with a variety of leg frames and configurations, providing advanced ergonomics for multiple applications.

Ace

Multi-Purpose Seating

Multi-Purpose: Designed by Claudio Bellini - Inner structure of back cushion fits closely to human body curve - Distinctive open lumbar design
Black or grey polypropylene shell - Four-legged or a sled base - Black frame as standard on chairs specified with black plastic
Grey frame (RAL 7035) as standard on chairs specified with Grey plastic

Leola

Multi-Purpose Seating

The striking design of Leola delivers a versatile, multifunctional chair. Its versatility is compounded by the many options available to the user including various frame types, arms, backs, seats and upholstery finishes. Functionally, the chair is an excellent performer stacking four units high from the floor, eight units high from a trolley and boasting additional extras such as attachable writing tablets and linking devices. Leola is a perfect choice for contemporary community areas, training facilities, waiting rooms, conference facilities and many other applications within the office, education and leisure environment.

Leola

Multi-Purpose Seating

Multiply

Multi-Purpose Seating

Multiply offers a modern design which is simple and compact, yet functional. The Non-upholstered chairs with metal legs can neatly stack together for easy storage or transportation making it perfect for transient spaces. With 2 base styles, the robust, tubular steel frame can be finished in silver, black, black graphite, white or our new colour options and the wooden angular legs are available in beech, walnut, espresso, wenge, black and white finishes. The seat shell is available in various finishes with choice of an open or a closed back. Upholstery can be integrated into the finished design by selecting an upholstered seat pad or fully upholstered option that can be finished in a choice of fabrics. Further personalisation includes the addition of support arms on the metal leg versions. In summary, Multiply possesses simplicity and versatility, making it adaptable to a multitude of spaces and needs.

Vice Versa

Multi-Purpose Seating

Vice Versa is an innovative product with distinctive lines, designed by Alberto Basaglia and Natalia Rota Nodari. It is assembled without screws and features a patented interlocking system that keeps costs to a minimum and facilitates disposal at the end of life. Vice Versa is a multi-purpose chair with a design that combines functionality, style and strength. The polypropylene version's seat and backrest are injection moulded using fireproof polypropylene and are available in six colours, with the Mesh versions backrest available in three colours. The frame is available in chrome, silver, black, black graphite, white or our new colour options. When combined together, the possibilities for personalisation and customisation are comprehensive. With the ability to stack up to 40 high, making it perfect for an area that requires space saving solutions. This is a chair suitable for a variety of tasks and environments.

Vice Versa

Focus

Multi-Purpose Seating

Focus is a traditional breakout chair that embraces comfort and performance. The high quality 20mm tubular four-legged frame is finished in chrome and provides a functional and robust platform for this affordable seating range. Partnered with the injection moulded seat and back, available in a choice of four vivid colours, this chair delivers a functional solution for a diverse range of applications. Like many of our breakout chairs, Focus has a ten-unit stacking ability, making it a chair that supports space saving requirements.

Hampton

Multi-Purpose Seating

The design of Hampton presents an elegant and stylish multi-purpose chair, suitable for breakout spaces, leisure environments, meeting rooms and boardrooms. Upholstered in your choice of fabric, the seat is offered on a four-legged wooden base or a four-star aluminium base with castors or glides. An integrated tilt mechanism is used with the four-star base to further enhance the chairs functionality and comfort.

Hampton

Multi-Purpose Seating

Escape

Stools

The Escape stool offers a high level of comfort and support, without compromising on style or functionality. It is built around a sturdy steel or wooden frame with an integral footrest. The seat shell is constructed of plywood, covered with a soft, cushioned fire-retardant foam before being upholstered in a choice of fabrics. The steel version is available in silver, black, black graphite, white or a range of colourful epoxy coated frame colours, as well as the standard chrome finish. The wooden legged version is available in six wooden finishes, beech, walnut, espresso, wenge, black or white. A stylish, comfortable and extremely practical solution for many workplace and leisure environments.

Vice Versa

Stools

The Vice Versa stool is an innovative product with distinctive lines, designed by Alberto Basaglia and Natalia Rota Nodari. It is assembled without screws and features a patented interlocking system that keeps costs to a minimum and facilitates disposal at the end of life. Vice Versa is a multi-purpose stool with a design that combines function, style and strength. The seat and backrest are injection moulded using fireproof polypropylene and are available in six colours, whilst the frame is made from steel wire and can be either chrome plated or epoxy coated in a silver, black, black graphite, white or our new colour finishes. When combined together, the possibilities for customisation are exceptional, delivering a stool suitable for a variety of tasks and environments.

Vice Versa

Stools

Stools: Designed by Basaglia and Nodari - Fixed height stool - Injection moulded polypropylene seat and back
With or without upholstered seat and back pads - Six injection moulded polypropylene shell finishes - Protective anti UV treatment
11mm chromed wire skid frame as standard - Protective glides - Stackable up to 4 stools high

Visitor and Lounge Seating

Cascara is a classical and beautifully crafted lounge chair that radiates style, standing out from the crowd at first glance. Its smooth lines and generous proportions deliver outstanding comfort. The Cascara family consists of a high back and medium back chair with a choice of white lacquered outer shell, walnut veneered outer shell or a fully upholstered variant, each available on a choice of six different base options, some of which include an optional integrated tilt mechanism, further increasing the chairs functionality and comfort. In addition, the Cascara family includes a bespoke footstool complementing the subtle lines and finish options. Cascara's distinctive profile is ideally suited to executive lounges, hotels, breakout areas, boardrooms and whole host of other applications.

Cascara

Host One

Pod

Host One and Two are exciting modular acoustic pods which have been newly added to our range to enhance our portfolio of booths and embrace the rapidly changing landscape of the workplace. ‘Host’ creates a walk-in sound absorbing work and privacy area engineered to reduce noise by up to 32 decibels. It combines sleek stylish exterior lines with perfectly painted pressed steel, laminated safety glass and host of internal features including an almost silent air circulation and ventilation system, motion sensitive LED lighting, touch control dimmer, universal power sockets and USB charging points. Together these combine to offer a soundproof, distraction free, space. When time is required for focused tasks or for attending virtual meetings, Host One delivers a single person private space.

Host One

Pod

6 Week Lead Time

Pod: High acoustic rating (32dB Noise Reduction) - Delivered unassembled - Air circulation and ventilation system - LED energy efficient lighting
On/off motion sensor lighting - Reinforced laminated safety glass - 'Dorma' door hardware - Built-in universal power socket and 2 x USB (A-Type) charging ports
Touch-controlled dimmer - White laminated work ledge - White epoxy painted pressed steel exterior - Charcoal black acoustic wall covering
Black carpeted floor finish

Certifications: High acoustic rating 32 dB / NIC (tested as a pod) - VOC and Formaldehyde-free rating 0.005 MG/M3

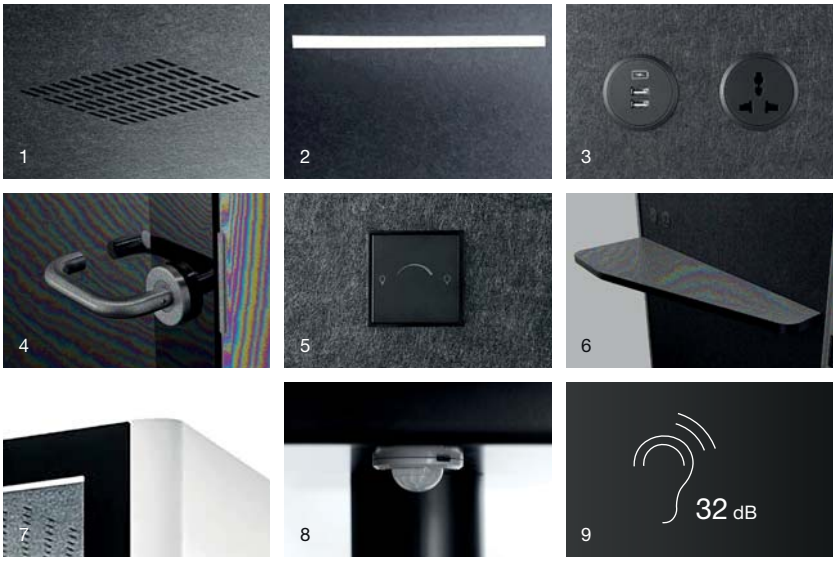
*Stool not Included

One-Person Pod
1000w x 1000d x 2170h

HOS1

***Delivery and Installation Charges**
Elite strongly recommend that our installation team deliver and install Host pods to avoid double handling. Elite will not be responsible for any damage that occurs as a result of clients using their own installation resource. If self-assembly is selected, full responsibility shall lie with the client upon delivery.
For installation during weekday / office hours (based on ground floor or lift access) - surcharge (subject to site survey)
For multiple units / weekday out of office hours / weekend installation / above or below ground floor - surcharge

Host One Features



1. Air circulation and ventilation system
2. LED energy efficient lighting
3. Built-in universal power socket and 2 x USB (A-Type) charging ports
4. Reinforced laminated safety glass and 'Dorma' door hardware
5. Touch-controlled dimmer
6. White laminated work ledge
7. White epoxy painted pressed steel exterior
8. On/off motion sensor lighting
9. Acoustically tested as a pod acquiring a rating of 32dB

Host Two

Pod

Host Two expands on the virtues of its ‘single pod’ derivative and is designed to create a modern stylish collaborative workspace for up to 4 people, designed using sustainable high-quality materials to fit naturally in almost any open office domain. An office within an office, ‘Host Two’ offers the perfect venue for undisturbed private one to one’s, team meetings, video conferencing and smart screen presentations. Furnished as standard with charcoal acoustic wall coverings, comfortable upholstered soft seating and a sleek white laminated table with integrated universal power supply and USB charging ports. Passive air circulation and ventilation combined with intuitive energy efficient LED lighting make for an environmentally sound workspace. A space which is further enhanced by sleek glass to the front and rear elevations and a smart painted pressed steel shell. Host Two provides a private echo-free and comfortable area to meet, think and focus.

Host Two

9. Acoustically tested as a pod acquiring a rating of 32dB

Retreat

Seating Booths

The modern working environment is changing and so is the furniture. The Retreat range recognises the need for more relaxed personal spaces for when employees work independently, and collaborative areas for teams within the workplace. The range includes both single and double booths with advanced acoustic qualities, providing a quieter place for working. Booths can be used as standalone units or connected together with a media wall and table to create one-to-one and group meeting spaces within the office. The exterior is fully upholstered to your personal specification and offers options for integrated technology such as LED lighting, power modules, USB charging, smart TV's and presentation displays, allowing users to access the technology they need for maximum productivity. Retreat provides an innovative furniture solution that is aesthetically pleasing, adaptable and functional.

Retreat

One-Seater Booth

6 Week Lead Time

One-Seater Booth: One-person booth - Booths can be positioned back to back, side to side or standalone - Steel leg frame - CMHR foam and fibre seat cushions Loose seat and back cushions - PEFC certified material - Acoustic qualities - Fits through standard commercial door opening - Delivered fully assembled

Fabric Compatibility: For compatible fabrics, see pages 13-14 for details

One-Seater High Back Booth
930w x 650d x 1640h

RETSB

Single Seater Booth: Groups 1-7	Groups 1-7

***Delivery and Installation Charges**

Elite strongly recommend that our installation team deliver and install Retreat and Hangout booths to avoid double handling. Elite will not be responsible for any damage that occurs as a result of clients using their own installation resource. If self-assembly is selected, full responsibility shall lie with the client upon delivery of products to their location.
Percentages for installation price calculations are based on Group 1 Fabric Bandings irrespective of the fabric selection.
For installation during weekday / office hours (based on ground floor or lift access) - **surcharge** per unit (greater value will always apply) (subject to site survey)
For multiple units / weekday out of office hours / weekend installation / above or below ground floor - **surcharge**

Georgia

Sofas and Booths

The Georgia soft seating range has been designed to deliver a complete solution that offers space for both personal solitude and team collaboration. The use of high-backed soft seating within working and learning environments is ideal for creating relaxing spaces where creativity can flow freely without the added distractions that busy settings can bring.

Single sofas can be connected with a privacy panel to create casual meeting booths, capable of accommodating between 2 and 6 people. The usability of Georgia's seating booths can be enhanced with the inclusion of a central table, power and data connectivity modules and mounted TV screens, creating intelligent in-office meeting spaces.

Evo Plus High Back

Modular Sofas

The Evo Plus High Back combines style and comfort with the modern movement for privacy within open-plan offices. Its modular form allows designers to easily create informal, relaxed and aesthetically pleasing working or social areas. A range of twenty-seven different modules is offered which can be used individually as standalone items or be linked together to create a unique statement piece. A range of options are available with Evo Plus offering various feet options and the choice to add power modules to the rectangular units. In addition, there is a privacy panel and table option that, when combined with two booths, effectively establishes an informal office meeting space that can accommodate up to six people. The Evo coffee table further completes the family. Evo Plus High Back is a truly versatile and adaptable range offering endless configuration and collaboration possibilities in the modern workplace.

Evo Plus Medium Back

Modular Sofas

Medium backed soft seating offers a compromise between open plan spaces and enclosed acoustic pods. Offering a space to communicate with colleagues, Evo Plus Medium Back provides a degree of visual and acoustic privacy and reduces distractions. The back height of this range is 300mm lower than the Evo High Back variant, that allows it to feel slightly less enclosed and more communal. As with the High Back, there are twenty-seven component pieces that can be individually combined, to create dynamic layouts suitable for many different work spaces. A range of options are available with Evo Plus offering various feet options, including a chrome foot, a choice of wooden feet or a Cubeform style leg. There is also the option to add power modules to the rectangular units. The Evo Plus coffee tables further complete the family. Fully upholstered to your specification, Evo Plus Medium Back is a contemporary, versatile choice.

Evo Plus

Modular Sofas

Evo Plus embraces the modern movement towards an agile environment. This modular seating range is designed to give architects the freedom to create layouts around unique work spaces. The Evo Plus family incorporates chairs, curved corners, chaise longues, triangular sections, sofas and coffee tables, making it suitable in any contemporary interior. It can be used as a standalone module or linked to create unique lounging areas in large open spaces. A range of options are available with Evo Plus offering various feet options, including a chrome foot, a choice of wooden feet or a Cubeform style leg. There is also the option to add power modules to the rectangular units. Evo Plus effortlessly partners versatility with contemporary modular design in a range of settings across corporate and hospitality environments.

Ella

Modular Sofas

Ella is an elegant modular sofa range that combines sharp lines with distinct geometric form. The Ella family incorporates chairs, benches, chaise longues and coffee tables, assuring its suitability to any contemporary interior. All of the units sit on a purpose engineered steel sled leg which is available in a variety of epoxy painted finishes. Ella fulfils the brief either as a standalone sofa or as a modular upholstered collection. The range delivers the visual, functional and comfort needs of both corporate and leisure environments as well as lounges, hotel foyers and retail interiors.

Kouch

Soft Seating

Taking inspiration from popular Scandinavian designs, Kouch uses a graceful wooden frame to support a fully upholstered one or two-seater sofa. The frame is overlaid with interwoven webbing for flexible support and cushioned with comfortable high density, fire retardant foam. The solid wooden frame gives a natural and earthy character to the couch, making it suitable for both modern and traditional environments.

Segment

Modular Units

Segment makes a vibrant, playful statement in terms of contemporary, modular furniture. Its distinctive design allows the units to be specified to work around you and your needs. It works especially well in a fluid, multi-functional space with changing needs or compromised space. Several different shapes make up the family including squared, circular, triangular, eclipse and rectangular, that are able to blend in with an array of environments. Fully upholstered to your specification the Segment range is built on a hardwood frame, cushioned with fire-resistant foam and fitted with protective feet. Multiple applications apply with Segment and it can work particularly well in waiting areas, bars, breakout zones and educational facilities.

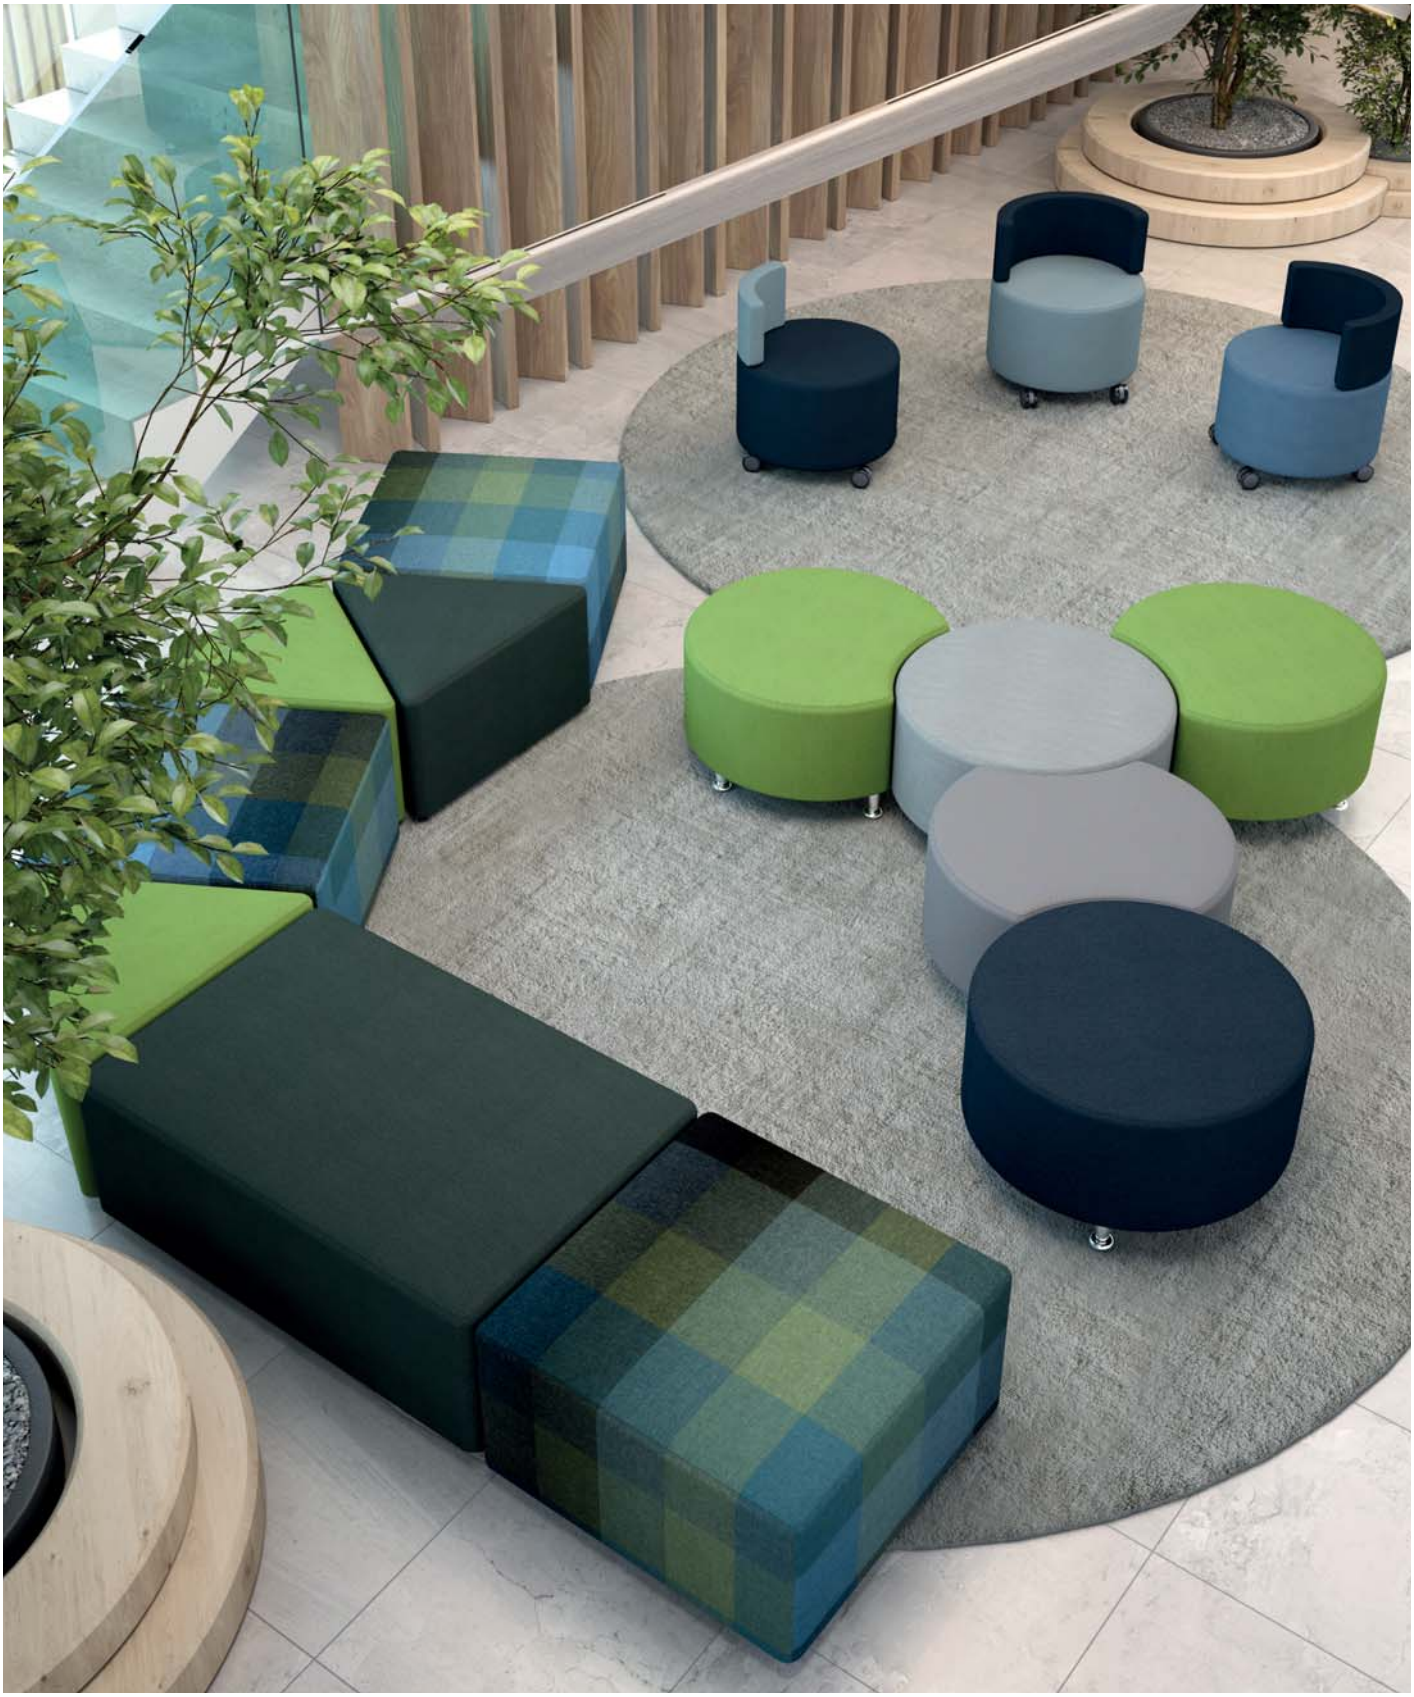
Fabric Selection Reference

When multiple fabric bands are specified, the unit price will reflect the highest fabric band requested.

Adaptiv

Modular Units



Graphic silhouette and colour define the soft, generous volumes of Adaptiv. A family of seating modules that have been designed to work as standalone units or grouped together in clusters. Adaptiv provides a casual touch of comfort along with aesthetically pleasing qualities in an agile workplace. Available in six different forms including circular, eclipse, double eclipse, square, rectangular and wedge, all fitted with protective feet with the option of chromed legs or castors for easy movement.

Conference / Meeting Tables

Various Conference / Meeting Ranges, Storage and Accessories

Taking inspiration from our core desking ranges, the Conference / Meeting portfolio delivers solutions and options that offer full flexibility, modern finishes and budgets to suit. Each table within the collection can be specified with wire management options and surface mounted power, data, and USB charging modules.

The introduction of timber framework into the portfolio with Lux Boardroom tables provides clients with a contemporary option to complement their workspace and make a lasting impression. The elegant Progress Plus Sit-Stand conference room table available in two configurations, with height adjustment of 650mm to 1280mm by use of a surface mounted touchpad, capable of accommodating up to 10 or 14 people.

How to Specify Cubeform

Vertical Frame

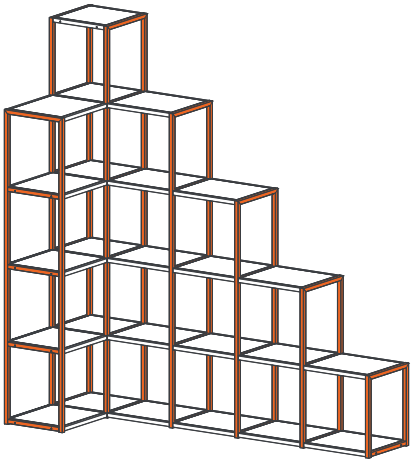
The code is for a Single Vertical Frame that is represented by a full uninterrupted orange vertical line. These Vertical Frames will be joined together when Shelves are specified.

Cubeforms specified 1 cube wide can be 1 or 2 cubes high only.

To create a configuration 2 cubes wide, 3 Vertical Frames are required,
to create a configuration 3 cubes wide, 4 Vertical Frames are required, and so on.

These can be used on standard or corner configurations.

The Vertical Frames are represented in orange.

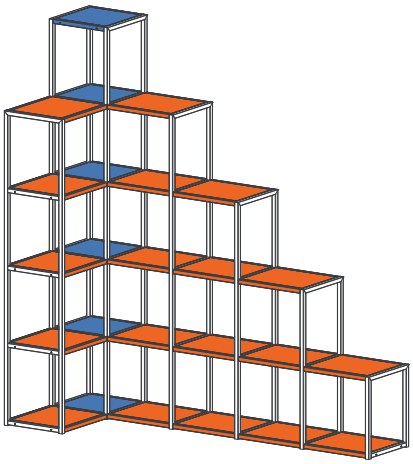


Shelves

The code is for shelves that are represented by the uninterrupted orange an blue horizontal lines. The Shelves also connect the Vertical Frames together at regular intervals on the unit. These provide the structural link for the overall unit.

Standard and Corner shelves must be specified separately.

The Standard shelves are represented in orange and the Corner shelves are represented in blue.



Accessories

A range of optional accessories are compatible with Cubeform delivering a number of flexible storage solutions.

All accessories can be retro-fitted.

Specific items have the option of different back styles. This includes a standard back, magnetic whiteboard back or fabric back.

Floor Standing Screens

Oases, Guardian, Park and Hush

Floor standing screens are an excellent way to break up working environments, maximising the functionality of the space and surroundings. A range of floor standing screens are available to segregate open areas into flexible work environments that can be reconfigured easily, as the requirement of the space changes. The acoustic properties of the panels support the reduction of noise pollution and transfer to other areas.

Oases

Agile Working Solutions

Contact Customer Services for more information

Oases Introduction

As workspaces evolve, there has been a rapid transition towards agile and hybrid working. This developing concept focusses on providing flexible environments for employees, allowing them to choose from a variety of settings according to the nature of what they are doing.

Oases' diverse range of flexible configurations offer modular solutions for single workspaces, one-to-one zones, instant dropdown points and soft seating for developing agile and focused workspaces.

Terms and Conditions

INTERPRETATION

1. In these Conditions, the following definitions apply:
"Business Day" means a day (other than a Saturday, Sunday or public holiday) when banks in London are open for business;
"Conditions" means the terms and conditions set out in this document as amended from time to time in accordance with clause 52;
"Contract" means the contract between EOF and the Customer for the sale and purchase of the Goods in accordance with these Conditions;
"Customer" means the person or firm who purchases the Goods from EOF;
"EOF" means Elite Office Furniture (UK) Ltd. a company incorporated in England and Wales with company number 03365655;
"Force Majeure Event" means has the meaning given in clause 46;
"Goods" means the goods (or any part of them) set out in the Order;
"Order" means the Customer's order for the Goods, as set out [in the Customer's purchase order form OR overleaf OR in the Customer's written acceptance of the EOF's quotation OR in the Customer's purchase order form, the Customer's written acceptance of EOF's quotation]
"Specials" means any bespoke products manufactured or otherwise supplied by EOF to the Customer's Specification; and
"Specification" means any specification for the Goods agreed between the parties in accordance with clause 9.

2. In these Conditions:

2.1 a person includes a natural person, corporate or unincorporated body (whether or not having separate legal personality);

2.2 a reference to a party includes its personal representatives, successors or permitted assigns;

2.3 a reference to a statute or statutory provision is a reference to such statute or provision as amended or re-enacted. A reference to a statute or statutory provision includes any subordinate legislation made under that statute or statutory provision, as amended or re-enacted;

2.4 any phrase introduced by the terms including, include, in particular or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms; and

2.5 a reference to writing or written includes faxes and e-mails.

BASIS OF THE CONTRACT

3. These Conditions apply to the Contract to the exclusion of any other terms that the Customer seeks to impose or incorporate, or which are implied by trade, custom, practice or course of dealing. The Order constitutes an offer by the Customer to purchase the Goods in accordance with these Conditions.

4. The Order shall only be deemed to be accepted when EOF issues a written acceptance of the Order, at which point the Contract shall come into existence. The Customer is responsible for ensuring that the terms of the Order and any applicable Specification are complete and accurate. The Customer must communicate any errors to EOF's Customer Services Team within 12 hours (and confirmed in writing within 24 hours) and accepts that failure to do will render them liable for potential abortive costs.

5. The Contract constitutes the entire agreement between the parties. The Customer acknowledges that it has not relied on any statement, promise or representation made or given by or on behalf of EOF which is not set out in the Contract.

6. Any samples, drawings, descriptive matter, or advertising produced by EOF and any descriptions or illustrations contained in EOF's catalogues, brochures and website are produced for the sole purpose of giving an approximate idea of the Goods described in them. They shall not form part of the Contract or have any contractual force.

7. A quotation for the Goods given by EOF shall not constitute an offer. A quotation shall only be valid for a period of 30 Business Days from its date of issue.

PRODUCTS

8. The Goods are, subject to clause 6, as described in EOF's catalogue as modified by any applicable Specification.

9. Requests for Special product(s) must be submitted on the official 'Elite Specials Request Form' which is available via the Elite web site or on request from EOF's Customer Services Department. When submitted the document will be processed by the Elite Specials team and a decision will be made either to accept or reject the request based on its validity and feasibility. It is EOF's aim to return completed forms within 2 – 3 Business Days.

10. To the extent that the Goods are to be manufactured in accordance with a Specification supplied by the Customer, the Customer shall indemnify EOF against all liabilities, costs, expenses, damages and losses (including any direct, indirect or consequential losses, loss of profit, loss of reputation and all interest, penalties and legal and other professional costs and expenses) suffered or incurred by EOF in connection with any claim made against EOF for actual or alleged infringement of a third party's intellectual property rights arising out of or in connection with EOF's use of the Specification. This clause 10 shall survive termination of the Contract.

11. EOF reserves the right to discontinue the manufacture or supply of the Goods or amend the specification of the Goods without notice:

11.1 if required by any applicable statutory or regulatory requirements; or

11.2 in accordance with its policy of continuous product development.

CANCELLATIONS AND VARIATIONS

12. It is in EOF's sole discretion, having regard to any agreed delivery dates, when to commence manufacture of the Goods. Cancellations must be communicated to EOF in writing. Cancellations received by EOF:

12.1 prior to manufacture may, in EOF's sole discretion, be subject to a 25% administration cost (such cost being a genuine pre-estimate of the cost of, amongst other things, the rescheduling of production runs);

12.2 following commencement of manufacture will be charged in full;

12.3 in respect of outsourced Goods (I.e. not manufactured by EOF) shall be subject to a 25% administration cost (such cost being a genuine pre-estimate of EOF cancelling its order with any third party supplier),
please note that whilst EOF may, but shall be under no obligation so to do, have regard to the stage of production reached when receiving the Customer's notice of cancellation when determining cancellation costs it reserves the right to charge for cancellations in full. Specials shall always be charged in full.

13. If the Customer wishes to change anything in the Contract, the request must be made in writing. EOF will inform the Customer whether it is willing to agree to the change and, if so, what will be the impact on the price and delivery date. The Customer must notify EOF in writing within 2 days of receiving EOF's response whether these changes are accepted and if so, the Contract will be deemed to have been varied accordingly. EOF will not proceed with the change until this notice is received. A request to reduce the quantity of Goods ordered will not result in a price reduction unless otherwise agreed in writing by EOF.

DELIVERY

14. EOF shall ensure that:

14.1 each delivery of the Goods is accompanied by a delivery note which shows the date of the Order, all relevant Customer and EOF reference numbers, the type and quantity of the Goods (including the code number of the Goods, where applicable), special storage instructions (if any) and, if the Order is being delivered by instalments, the outstanding balance of Goods remaining to be
delivered; and

14.2 if EOF requires the Customer to return any packaging materials to EOF, that fact is clearly stated on the delivery note. The Customer shall make any such packaging materials available for collection at such times as EOF shall reasonably request. Returns of packaging materials shall be at EOF's expense.

15. EOF shall deliver the Goods to the location set out in the Order (one address only) or such other location as the parties may agree ("Delivery Location") at any time after EOF notifies the Customer that the Goods are ready. Delivery requests for alternative addresses will be charged at a minimum of £124.00 and must be approved by EOF's Customer Services Team prior to placing the Order. EOF reserves the right to decline any such request.

16. Delivery of the Goods shall be completed on the Goods' arrival at the Delivery Location and in the case of ex-works on EOF notifying the Customer that the Goods are ready for collection. All deliveries must be signed for & appropriately dated. Items cannot be signed unchecked, it is the Customer's responsibility to visually check items delivered and investigate items where the packaging is visibly damaged or torn. Deliveries are inclusive of tailboard only where it is the Customer's responsibility to provide free assistance in unloading the vehicle. Once unloaded to the tailboard of the vehicle and handed to the Customer, it is their responsibility from here on. Notification of shortages and/or damages must be made in writing to EOF within 3 days of delivery.

17. Any dates quoted for delivery are approximate only, and the time of delivery is not of the essence. EOF shall not be liable for any delay in delivery of the Goods that is caused by a Force Majeure Event or the Customer's failure to provide EOF with adequate delivery instructions or any other instructions that are relevant to the supply of the Goods. EOF deliver on multi-drop vehicles and no guarantee can be made to set timescales. However, if the volume permits a dedicated delivery can be made (subject to additional costs) and an estimated time of delivery can be requested. In such cases EOF will not be liable for financial penalties resulting in late delivery of products.

18. EOF shall have no liability for any failure to deliver the Goods to the extent that such failure is caused by a Force Majeure Event or the Customer's failure to provide EOF with adequate delivery instructions or any other instructions that are relevant to the supply of the Goods.

19. If the Customer fails to take delivery of the Goods within 3 Business Days of EOF notifying the Customer that the Goods are ready, then, except where such failure or delay is caused by a Force Majeure Event or EOF's failure to comply with its obligations under the Contract:

19.1 delivery of the Goods shall be deemed to have been completed at 9.00 am on the third Business Day after the day on which EOF notified the Customer that the Goods were ready; and

19.2 EOF shall store the Goods until delivery takes place, and charge the Customer for all related costs and expenses (including insurance, storage and redelivery).

20. If 10 Business Days after the day on which EOF notified the Customer that the Goods were ready for delivery the Customer has not taken delivery of them, EOF may resell or otherwise dispose of part or all of the Goods and, after deducting reasonable storage and selling costs, account to the Customer for any excess over the price of the Goods paid by the Customer or charge the Customer for any shortfall below the price of the Goods.

21. EOF may deliver the Goods by instalments, which shall be invoiced and paid for separately. Each instalment shall constitute a separate Contract. Any delay in delivery or defect in an instalment shall not entitle the Customer to cancel any other instalment.

QUALITY/RETURNS

22. EOF warrants that on delivery, and for a period of 5 years from the date of delivery ("Warranty Period"), the Goods shall:

22.1 conform in all material respects with their description and any applicable Specification;

22.2 be free from material defects in design, material and workmanship; and

22.3 be of satisfactory quality (within the meaning of the Sale of Goods Act 1979); and

22.4 be fit for any purpose held out by EOF.

23. Subject to clause 24 if:

23.1 the Customer gives notice in writing to EOF during the Warranty Period within a reasonable time of discovery that some or all of the Goods do not comply with the warranty set out in clause 22;

23.2 EOF is given a reasonable opportunity of examining such Goods; and

23.3 the Customer (if asked to do so by EOF) returns such Goods to EOF's place of business at EOF's cost,
EOF shall, at its option, repair or replace the defective Goods, or refund the price of the defective Goods in full.

24. EOF shall not be liable for the Goods' failure to comply with the warranty set out in clause 22 in any of the following events:

24.1 the Customer makes any further use of such Goods after giving notice in accordance with clause 22;

24.2 the defect arises because the Customer failed to follow EOF's oral or written instructions as to the storage, commissioning, installation, use and maintenance of the Goods or (if there are none) good trade practice regarding the same;

24.3 the defect arises as a result of EOF following any drawing, design or Specification supplied by the Customer;

24.4 the Customer alters or repairs such Goods without EOF's prior written consent;

24.5 the defect arises as a result of fair wear and tear, wilful damage, negligence, or abnormal storage or working conditions; or

24.6 the Goods differ from their description or, as the case may be, the Specification as a result of changes made to ensure they comply with applicable statutory or regulatory requirements.

25. Wood veneers vary in grain and colour, EOF do not book match veneers and work with pre-veneered boards limiting the matching of veneers on adjoining surfaces. EOF will not be liable whatsoever for any variation and shall be under no obligation to accept return of Goods where a variation occurs. Veneer is a natural material and variations on pre-veneered board are inevitable. If the Customer requires book matching on veneers a specialist supplier should be identified and appointed.

26. Except as provided in clauses 22 to 28 (inclusive), EOF shall have no liability to the Customer in respect of the Goods' failure to comply with the warranty set out in clause 22.

27. Except as set out in these Conditions, all warranties, conditions and other terms implied by statute or common law are, to the fullest extent permitted by law, excluded from the Contract.

28. These Conditions shall apply to any repaired or replacement Goods supplied by EOF.

Terms and Conditions

TITLE AND RISK

29. The risk in the Goods shall pass to the Customer on completion of delivery.

30. Title to the Goods shall not pass to the Customer until EOF has received payment in full (in cash or cleared funds) for:

    30.1 the Goods; and

    30.2 any other goods or services that EOF has supplied to the Customer.

31. Until title to the Goods has passed to the Customer, the Customer shall:

    31.1 hold the Goods on a fiduciary basis as EOF's bailee;

    31.2 store the Goods separately from all other goods held by the Customer so that they remain readily identifiable as EOF's property;

    31.3 not remove, deface or obscure any identifying mark or packaging on or relating to the Goods;

    31.4 maintain the Goods in satisfactory condition and keep them insured against all risks for their full price from the date of delivery;

    31.5 notify EOF immediately if it becomes subject to any of the events listed in clause 43; and

    31.6 give EOF such information relating to the Goods as EOF may require from time to time,
    but the Customer may resell or use the Goods in the ordinary course of its business.

32. If before title to the Goods passes to the Customer the Customer becomes subject to any of the events listed in clause 43, or EOF reasonably believes that any such event is about to happen and notifies the Customer accordingly, then, provided that the Goods have not been resold, or irrevocably incorporated into another product, and without limiting any other right or remedy EOF may have, EOF may at any time require the Customer to deliver up the Goods and, if the Customer fails to do so promptly, enter any premises of the Customer or of any third party where the Goods are stored in order to recover them.

FINANCIAL - PRICES

33. The price of the Goods shall be the price set out in the Order, or, if no price is quoted, the price set out in EOF's published price list in force as at the date of delivery.

34. EOF may, by giving notice to the Customer at any time before delivery, increase the price of the Goods to reflect any increase in the cost of the Goods that is due to:

    34.1 any factor beyond EOF's reasonable control (including foreign exchange fluctuations, increases in taxes and duties, and increases in labour, materials and other manufacturing costs);

    34.2 any request by the Customer to change the delivery date(s), quantities or types of Goods ordered, or the Specification; or

    34.3 any delay caused by any instructions of the Customer or failure of the Customer to give EOF adequate or accurate information or instructions.

35. The price of the Goods is inclusive of the costs and charges of packaging. (Export product will be subject to additional charges, please contact the Elite Customer Services for prices).

36. The price of the Goods is exclusive of amounts in respect of value added tax ("VAT"). The Customer shall, on receipt of a valid VAT invoice from EOF, pay to EOF such additional amounts in respect of VAT as are chargeable on the supply of the Goods.

FINANCIAL - PAYMENT

37. EOF requires 2 bank references for new account applications and reserves the right to change its financial requirements as and when it deems it appropriate.

38. EOF may invoice the Customer for the Goods on or at any time after the completion of delivery.

39. The Customer shall pay the invoice in full and in cleared funds by the end of the month following the month the invoice was dated. Time of payment is of the essence.

40. If the Customer fails to make any payment due to EOF under the Contract by the due date for payment ("due date"), then the Customer shall pay interest on the overdue amount at the rate of 2.5% per annum above [HSBC]'s base rate from time to time. Such interest shall accrue on a daily basis from the due date until the date of actual payment of the overdue amount, whether before or after judgment. The Customer shall pay the interest together with the overdue amount. EOF reserves the right to charge interest on any overdue payment in accordance with the Late Payment of Commercial Debts (Interest) Act 1998. The Customer shall be liable for all reasonable costs (including legal and court costs) associated with the collection of overdue accounts.

41. The Customer shall pay all amounts due under the Contract in full without any deduction or withholding except as required by law and the Customer shall not be entitled to assert any credit, set-off or counterclaim against EOF in order to justify withholding payment of any such amount in whole or in part. EOF may at any time, without limiting any other rights or remedies it may have, set off any amount owing to it by the Customer against any amount payable by EOF to the Customer.

CUSTOMER'S INSOLVENCY OR INCAPACITY

42. If the Customer becomes subject to any of the events listed in clause 43, or EOF reasonably believes that the Customer is about to become subject to any of them and notifies the Customer accordingly, then, without limiting any other right or remedy available to EOF, EOF may cancel or suspend all further deliveries under the Contract or under any other contract between the Customer and EOF without incurring any liability to the Customer, and all outstanding sums in respect of Goods delivered to the Customer shall become immediately due.

43. For the purposes of clause 42, the relevant events are:

    43.1 the Customer suspends, or threatens to suspend, payment of its debts, or is unable to pay its debts as they fall due or admits inability to pay its debts, or (being a company) is deemed unable to pay its debts within the meaning of section 123 of the Insolvency Act 1986, or (being an individual) is deemed either unable to pay its debts or as having no reasonable prospect of so doing, in either case, within the meaning of section 268 of the Insolvency Act 1986, or (being a partnership) has any partner to whom any of the foregoing apply;

    43.2 the Customer commences negotiations with all or any class of its creditors with a view to rescheduling any of its debts, or makes a proposal for or enters into any compromise or arrangement with its creditors other than (where the Customer is a company) where these events take place for the sole purpose of a scheme for a solvent amalgamation of the Customer with one or more other companies or the solvent reconstruction of the Customer;

    43.3 (being a company) a petition is filed, a notice is given, a resolution is passed, or an order is made, for or in connection with the winding up of the Customer, other than for the sole purpose of a scheme for a solvent amalgamation of the Customer with one or more other companies or the solvent reconstruction of the Customer;

    43.4 (being an individual) the Customer is the subject of a bankruptcy petition or order;

    43.5 a creditor or encumbrancer of the Customer attaches or takes possession of, or a distress, execution, sequestration or other such process is levied or enforced on or sued against, the whole or any part of its assets and such attachment or process is not discharged within 14 days;

    43.6 (being a company) an application is made to court, or an order is made, for the appointment of an administrator or if a notice of intention to appoint an administrator is given or if an administrator is appointed over the Customer;

    43.7 (being a company) a floating charge holder over the Customer's assets has become entitled to appoint or has appointed an administrative receiver;

    43.8 a person becomes entitled to appoint a receiver over the Customer's assets or a receiver is appointed over the Customer's assets;

    43.9 any event occurs, or proceeding is taken, with respect to the Customer in any jurisdiction to which it is subject that has an effect equivalent or similar to any of the events mentioned in clause 43.1 to clause 43.8 (inclusive);

    43.10 the Customer suspends, threatens to suspends, ceases or threatens to cease to carry on all or substantially the whole of its business;

    43.11 the Customer's financial position deteriorates to such an extent that in EOF's opinion the Customer's capability to adequately fulfil its obligations under the Contract has been placed in jeopardy; and

    43.12 (being an individual) the Customer dies or, by reason of illness or incapacity (whether mental or physical), is incapable of managing his or her own affairs or becomes a patient under any mental health legislation.

    43.13 Termination of the Contract, however arising, shall not affect any of the parties' rights and remedies that have accrued as at termination. Clauses which expressly or by implication survive termination of the Contract shall continue in full force and effect.

LIMITATION OF LIABILITY

44. Nothing in these Conditions shall limit or exclude EOF's liability for:

    44.1 death or personal injury caused by its negligence, or the negligence of its employees, agents or subcontractors (as applicable);

    44.2 fraud or fraudulent misrepresentation;

    44.3 breach of the terms implied by section 12 of the Sale of Goods Act 1979;

    44.4 defective products under the Consumer Protection Act 1987; or

    44.5 any matter in respect of which it would be unlawful for the EOF to exclude or restrict liability.

45. Subject to clause 44:

    45.1 EOF shall under no circumstances whatever be liable to the Customer, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, for any loss of profit, or any indirect or consequential loss arising under or in connection with the Contract; and

    45.2 EOF's total liability to the Customer in respect of all other losses arising under or in connection with the Contract, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, shall in no circumstances exceed the price of the Goods.

FORCE MAJEURE

46. EOF shall not be liable for any failure or delay in performing its obligations under the Contract to the extent that such failure or delay is caused by a Force Majeure Event. A Force Majeure Event means any event beyond a party's reasonable control, which by its nature could not have been foreseen, or, if it could have been foreseen, was unavoidable, including strikes, lock-outs or other industrial disputes (whether involving its own workforce or a third party's), failure of energy sources or transport network, acts of God, war, terrorism, riot, civil commotion, interference by civil or military authorities, national or international calamity, armed conflict, malicious damage, breakdown of plant or machinery, nuclear, chemical or biological contamination, sonic boom, explosions, collapse of building structures, fires, floods, storms, earthquakes, loss at sea, epidemics or similar events, natural disasters or extreme adverse weather conditions, or default of suppliers or subcontractors. If the event of force majeure continues for a continuous period in excess of 43 months, the Customer shall be entitled to give notice in writing to EOF to terminate the Contract.

GENERAL

47. EOF may at any time assign, transfer, charge, subcontract or deal in any other manner with all or any of its rights or obligations under the Contract.

48. The Customer may not assign, transfer, charge, subcontract or deal in any other manner with all or any of its rights or obligations under the Contract without EOF's prior written consent.

49. Any notice or other communication given to a party under or in connection with the Contract shall be in writing, addressed to that party at its registered office (if it is a company) or its principal place of business (in any other case) or such other address as that party may have specified to the other party in writing in accordance with this clause, and shall be delivered personally, sent by pre-paid first class post, recorded delivery, commercial courier, fax or e-mail.

50. A notice or other communication shall be deemed to have been received: if delivered personally, when left at the address referred to in clause 49; if sent by pre-paid first class post or recorded delivery, at 9.00 am on the second Business Day after posting; if delivered by commercial courier, on the date and at the time that the courier's delivery receipt is signed; or, if sent by fax or e-mail, one Business Day after transmission.

51. The provisions of clauses 49 and 50 shall not apply to the service of any proceedings or other documents in any legal action.

52. If any court or competent authority finds that any provision of the Contract (or part of any provision) is invalid, illegal or unenforceable, that provision or part-provision shall, to the extent required, be deemed to be deleted, and the validity and enforceability of the other provisions of the Contract shall not be affected.

53. If any invalid, unenforceable or illegal provision of the Contract would be valid, enforceable and legal if some part of it were deleted, the provision shall apply with the minimum modification necessary to make it legal, valid and enforceable.

54. A waiver of any right or remedy under the Contract is only effective if given in writing and shall not be deemed a waiver of any subsequent breach or default. No failure or delay by a party to exercise any right or remedy provided under the Contract or by law shall constitute a waiver of that or any other right or remedy, nor shall it preclude or restrict the further exercise of that or any other right or remedy. No single or partial exercise of such right or remedy shall preclude or restrict the further exercise of that or any other right or remedy.

55. A person who is not a party to the Contract shall not have any rights under or in connection with it.

56. Except as set out in these Conditions, any variation to the Contract, including the introduction of any additional terms and conditions, shall only be binding when agreed in writing and signed by EOF.

57. The Contract, and any dispute or claim arising out of or in connection with it or its subject matter or formation (including non-contractual disputes or claims), shall be governed by, and construed in accordance with, English law, and the parties irrevocably submit to the exclusive jurisdiction of the courts of England and Wales.
