Natural Character

Falun Oak – Broad Weave & Stripwood perimeter

0.7mm

WEAR LAYER

A thicker wear layer means higher durability, for a floor that stands the test of time.

ANTIMICROBIAL PROTECTION

Amtico Form products are specified as standard with integral antimicrobial protection.

19dB

ACOUSTIC BACKING

Acoustic backing can be specified on standard planks and tiles and Large & Small Parquet without stripping.

AMTICO BIO

Available to specify with 46% bio-attributed content.

With careful attention to every grain, knot and natural tone, Form's commitment to respectfully replicating real woods and stones creates an organic authenticity in any commercial space.

Flooring fit for the future

Specify Amtico Bio
Now available across the Form collection, Amtico Bio is our first bio-attributed LVT flooring. Made with renewable biomass derived PVC, which saves more than 90% of the CO_2 emissions compared to traditional fossil fuel based PVC. Amtico Bio offers the same performance and finish with a reduced carbon footprint.

We use carefully selected and audited sources of biomass to create the renewable ethylene that goes into our bio-attributed PVC. This includes by-products such as Crude Tall Oil (CTO) from trees and Used Cooking Oil (UCO).

Form is available to specify with 46% bio-attributed content.

What silence looks like

19dB

Specify Amtico Acoustic
Amtico Acoustic enhances the acoustic properties of LVT by reducing impact sound transmission by up to 19dB and also provides an extra level of comfort underfoot.

Amtico Acoustic brings another layer of performance and versatility to the design, quality and durability you expect from Amtico.

Added protection against bacteria and viruses

Antimicrobial Protection
We add an ionic silver additive to the urethane coating that provides a hygienic surface where bacteria and viruses will struggle to multiply or survive. Embedded antimicrobials are not designed to replace cleaning and disinfection, but to provide an additional level of protection between regular cleaning cycles in high traffic spaces.

Independently verified against E.Coli and MRSA, to ISO 22196, showing a reduction of >99.9% after 24hrs. Also tested against SARS-CoV-2, to ISO 21702, showing an 85.5% reduction after 24 hours compared to an untreated control, and a reduction of >99.9% against the initial inoculation.

All our antimicrobial flooring achieves the same levels of high performance against sunlight, scuffs and stains, and heavy traffic that you expect from any Amtico floor.

Accreditations

Our ethos is to combine creativity and innovation with the highest levels of quality – design, manufacturing, product and service.

Amtico Form has been certified to achieve the M1 building materials emissions classification for indoor air quality from the Finnish Information Foundation RTS.

Amtico Form products have been UPEC classified, therefore conforming to local French certification.

Revetements de sol resilients 326-003.1
https://evaluation.cstb.fr/en/search

Amtico is a member of the professional association for flexible floor covering manufacturers in Germany.

The CE mark is a confirmation by Amtico that our products are in compliance with European health, safety and environmental requirements (as required by Council Directive 89/106/EEC and detailed in EN 14041).

Our quality system complies with BS EN ISO 9001 and is certified by LRQA.

The UKCA mark is a confirmation by Amtico that our products meet the UK Regulations as defined in the relevant Statutory Instruments (SIs).

Amtico Form products are third-party certified for low-VOC emissions contributing towards good indoor air quality.

Amtico International GmbH is a member of the DGNB German Sustainable Building Council.

ORTHO-PHTHALATE FREE

Amtico Form products are manufactured using ortho-phthalate free plasticisers.

Amtico products comply with BSI ISO 14001 environmental standards.

Amtico Form complies with Indoor Air Comfort Gold version 6.0 and is certified as a low-emissions product contributing to a healthy indoor environment.

Amtico International are proud to be affiliated with the Valobat Eco Organisation, whose objective is to collect and organise the end of life cycle of Amtico products in France.

Visit amtico.com for more information on our product range, inspiring ideas, maintenance and installation advice. Every effort is made to achieve accurate reproduction of products in this brochure, however printing limitations can be misleading. Selection of products should be made from actual samples. Samples are small pieces cut from standard tiles. They give only a general indication of the design. Tone and shading can vary slightly from batch to batch and it is not possible to guarantee that the sample will exactly match the material supplied. The policy of the Company is one of continuous development and improvement and the right is reserved to add or delete from the range or change patterns without prior notification. All metric sizes are rounded. All products are manufactured in line with EN ISO 10582. Brochure correct at the time of printing.
