about

Founded in 1973, award winning Franklite is one of the leading innovators in high-quality decorative lighting. Working with clients, architects, lighting consultants, interior designers, M & E consultants and distributors for the residential, hospitality and commercial markets throughout the UK, Europe, Middle and Far East.

Franklite has a story to tell. We are far more than just a lighting manufacturer; we are creators, visionaries and craftspeople. We continue to pride ourselves on our manufacturing and service excellence. This includes offering products that balance optimal performance with beautiful aesthetics and have successfully supplied our exceptional luminaires to palaces, embassies, hotels, private residences and multi-residential projects.

Franklite remains at the forefront of the lighting industry with incredible in-house technology which includes the Rigo Near-Field Goniophotometer and highly-skilled design and technical teams who continue to develop signature products. Our LED plates and most recently award winning tuneable light engines are manufactured in-house and compatible with many of our luminaires.

in-house

With state-of-the-art production and testing facilities at our factory right in the heart of Milton Keynes, it's here that our technical team conducts in-house production, testing and assembly of many of our decorative luminaries.

What makes our testing process so rigorous is the use of our Rigo Goniophotometer; cutting edge technology used for the measurement of light emitted from a fitting at different angles. Our photometer allows the fitting to hang as it would in-situ for a more realistic light output than most photometers in use today.
