GALAXY

WIDE-WIDTH DRAPERY

TECHNICAL SPECIFICATION SHEET

sekers

ABOUT

Inspired by the infinite beauty of the cosmos, Sekers presents GALAXY, an extraordinary wide width contract curtain fabric collection designed to bring celestial elegance to interior spaces. Featuring two distinct designs, Aster and Acrux, this collection embodies the luminosity, depth, and mystery of the night sky. Reminiscent of distant stardust shimmering in the night, Aster is a sheer fabric that allows light to flow effortlessly through its delicate weave. Certified to meet IMO standards, Aster is not only a striking choice for hospitality and leisure interiors but is also perfectly suited for marine applications.

Named after one of the brightest stars in the Southern Cross, Acrux offers a beautifully textured design that evokes the layered complexity of distant galaxies. Rich in depth yet soft in tone, this contract curtain fabric enhances interiors with a refined and timeless aesthetic, making it an ideal choice for the hospitality and leisure sectors.

With environmental responsibility at its core, GALAXY proudly meets Global Recycled Standard (GRS), ensuring a commitment to sustainability without compromising on performance or beauty. Available in 14 beautiful tones from Meteorite Charcoal – A deep, dramatic shade evoking the darkness of the universe, perfect for creating contrast and depth, to Stardust Beige – A delicate, neutral tone inspired by interstellar dust clouds, offering both elegance and versatility.

Sekers' GALAXY collection redefines contract curtains, offering a harmonious blend of galactic inspiration, functional excellence, and sustainability.
