ABOUT

Introducing Rey, a luxurious cut velvet, designed for contract upholstery applications in the hospitality, marine, and leisure markets. Rey's distressed velvet pattern and weathered texture gives it a refined, vintage appearance.

Rey beautifully merges traditional elegance with modern trends. With its intricate design combining various shades, creating a sense of depth and a soft, plush feel. This durability and sophisticated look make it suitable for environments where both aesthetics and resilience are key, such as hotel lobbies, cruise ship lounges, and exclusive leisure spaces.

The fabric incorporates FibreGuard technology, providing superior stain resistance that helps maintain its pristine appearance even in high-traffic areas. This feature ensures that spills and stains can be easily wiped away.

Rey combines style and functionality, making it an outstanding choice for projects that demand both luxury and practicality in upholstery.
