RECLINERS

Rise recliner mechanisms

Our mechanisms provide a unique range of sitting and recline positions, making sure you can find the perfect positions to enjoy relaxing and resting in your chair. The rise movements provide you with a little extra help to stand and walk comfortably away from your chair.

Single Motor Tilt in Space

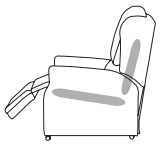

The Single Motor Tilt in Space mechanism allows the leg rest to rise, slightly changing the seat angle, but always ensuring that a constant back angle of 90° is maintained as the chair moves through to recline. (Weight Limit: Up to 20 Stone as standard - for additional weight limits please contact the Barons team for a quote)

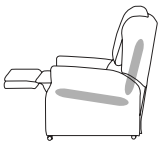

Full Rise

Static Position

Semi Recline

Footrest Horizontal

Fully Reclined

Standard Dual Motor

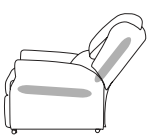

The two motors allow the back rest to move independently of the leg rest enabling a wide range of relaxing positions, from sitting upright and raising the leg rest to relieve tired legs, to a fully reclined resting position. (Weight Limit: Up to 20 Stone as standard - for additional weight limits please contact the Barons team for a quote)

SEAT CUSHION OPTIONS

NOTE: additional charges apply for the optional extras

In-built Pressure Care	Options	Product Overview
	Easiform Reflex foam  Pressure Risk VERY LOW	**Easiform** (Reflex) For standard seating, our softest foam cushion with high quality Reflex foam filler for gentle comfort. **Note:** This seat option comes as standard on all our recliners.
	Viscoform Memory foam Reflex foam  Pressure Risk LOW MEDIUM	**Viscoform** (Memory Foam) For those who have good posture and mobility but are seated for greater than one hour at a time and require pressure relief and supported comfort. This cushion has a high-density foam base which offers a supportive and firm seat base with a top layer of memory foam to allow immersion into the cushion, giving stability and a large surface area to reduce pressure levels.
	Liquiform Memory foam Liquid gel sac Reflex foam  Pressure Risk MEDIUM HIGH	**Liquiform** (Gel/Memory Foam) For those who have good posture and mobility but sit for long periods of time and require pressure relief and supported comfort. Recommended for people with limited muscle bulk or at risk of excessive weight loss. This cushion has a high-density foam which offers a supportive and firm seat base. The foam is topped with a fluid liquid gel in a soft silicone cover which provides a high level of pressure relief. The liquid gel helps to dissipate heat and constantly adapts to the user's movement.

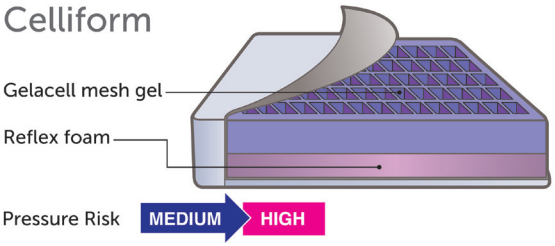

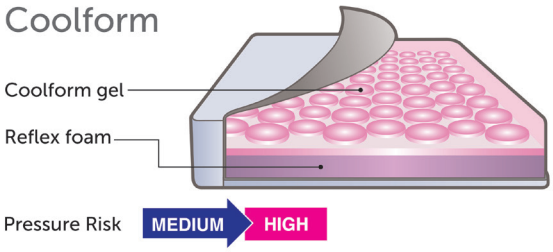

Note: 4 way stretch fabric must be chosen for the seating area

SEAT CUSHION OPTIONS

NOTE: additional charges apply for the optional extras

In-built Pressure Care	Options	Product Overview
		**Celliform** (Gelacell) For those sitting for long periods with specific comfort issues such as a high risk of pressure sores. Gelacell has a unique cell matrix that distributes pressure across the contact area, as it contours and yields in response to weight redistribution. Gelacell absorbs body heat, reducing the risk of creating an environment that could increase pressure risks, the grid design also encourages air circulation. Gelacell is clinically tested and passes all dermatological tests for skin contact. Maximum weight of user 127 kg (20 stone)
		**Coolform** (Soft Cool Gel) For those sitting for long periods with specific comfort issues such as a high risk of pressure sores. This cushion uses the latest medical grade silicone gel technology allowing pressure to be evenly distributed. The gel conforms to the shape of the body and equalises to body temperature. The gel cells allow air to flow easily and Coolform is totally odourless and hypoallergenic.

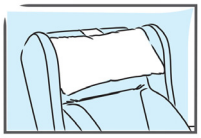

Note: 4 way stretch fabric must be chosen for the seating area
