Options - Bases 12 - 13

Options - Finishing Details 14 - 17

Examples of our work 18 - 27

Over the years, Hill cross furniture have supplied fixed and booth seating to resturants, bars, cruise ships, the healthcare sector and blue-chip companies... discuss your specification with a member of the team today.

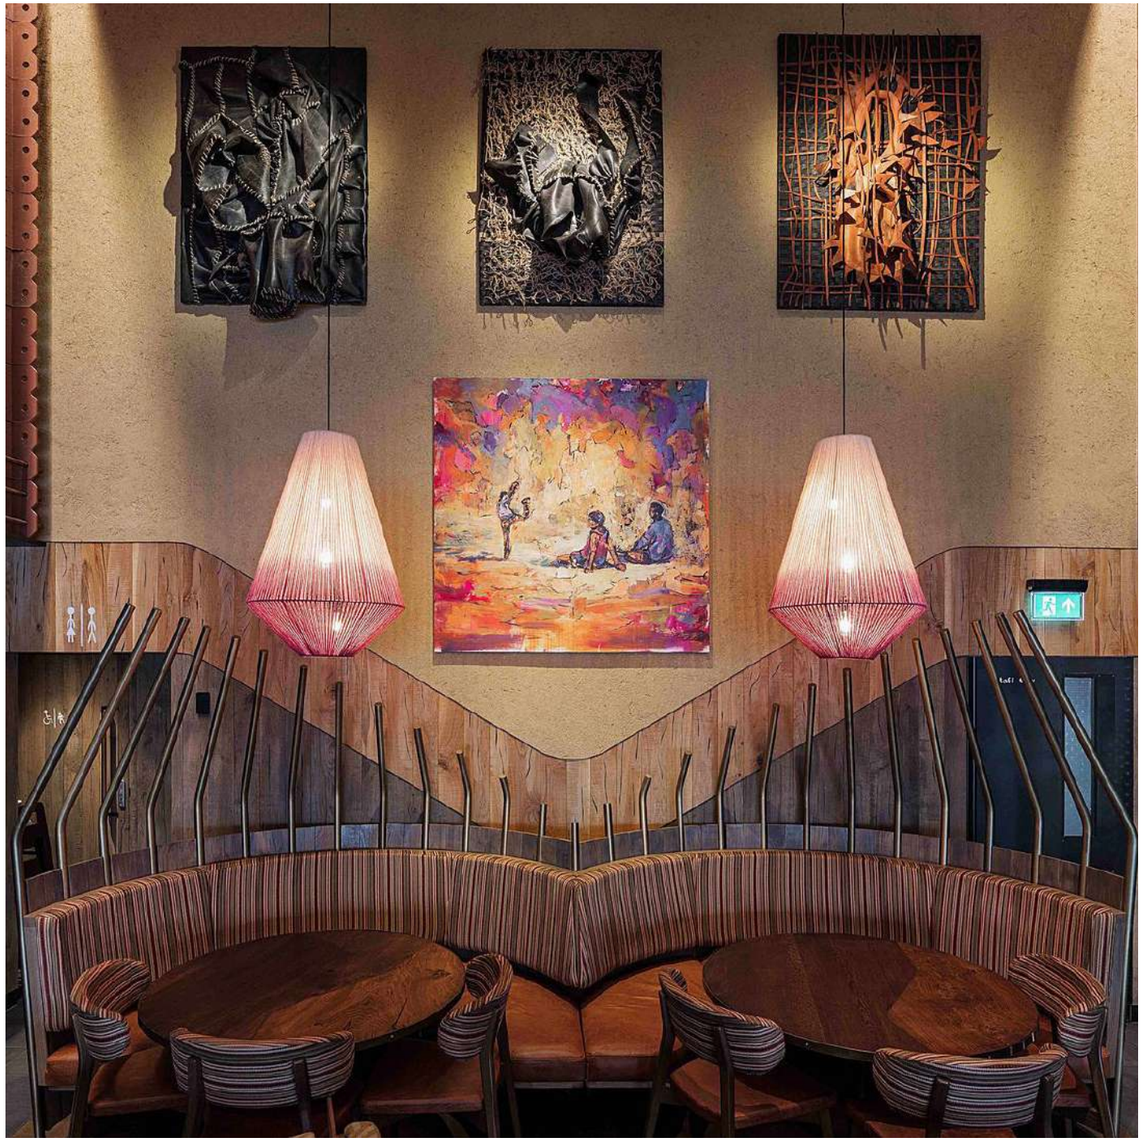

Hill Cross Furniture only supply to the contract market and products may be subject to minimum order quantities. Discounts may be available for large orders. Contact us to discuss further.

# WHY CHOOSE FIXED SEATING

Fixed seating provides comfort for customers and creates a unique identity for the venue. Booths, banquettes and benches are usually manufactured to fit the curves and contours of the building and help create a natural ambience where the furniture is an inclusive part of the venue. Deep seated, high backed upholstery offers a visually enticing space to spend time.

The relationship between furniture and venue, due to it shaping the lines of the space, can give the venue an identity and atmosphere that may not have existed with just loose furniture. When paired with a design that utilises the shape and flow of a venue, fixed seating offers a unique and creative option.

The quality of Hill Cross Furniture's fixed seating is undeniable. Always constructed using robust commercial grade frames and high quality foams and fabrics they are made to withstand the rigors of a commercial environment. We also have sustainable fixed seating options, such as springs, natural fibres and recycled fabrics. Talk to us about your sustainable projects.

# **OUR** 10 STEP PROCESS

### 1. INITIAL CONTACT WITH HC
- Conversation with Hill Cross technical sales team

### 2. UNDERSTANDING THE PROJECT
- Provision of ideas/advice and options to meet the budget
- Clarification of finer details such as wood finishes, dimensions and fabric options
- Clarification of timesscales to opening

### 3. EMAIL QUOTE
- Confirmation of all details, prices and delivery date
- Follow up quote within 48 hours

### 4. ORDER CONFIMATION
- Deposit paid to confirm order
- Project Manager allocated to the project

### 5. PROCUREMENT BY HILL CROSS BUYERS
- Order placement with trusted suppliers
- Timely arrival of goods to enable production while remaining on budget.

### 6. CAD/DESIGN
- Site survey
- Programme of works drawn up
- 3D design intent drawings
- Customer sign off
- Design freeze to ensure we meet all deadlines

### 7. MANUFACTURE SEATING
- CNC
- Assembly of frames
- Addition of any bespoke features
- Foam
- Quality Control

### 8. UPHOLSTERY
- Template and cut fabric or leather ready for sewing
- Specialist stiTch detail where relevant

### 9. DELIVERY AND INSTALLATION
- Dedicated Hill Cross drivers and fitters
- Room placement of furniture based on the client GA
- Disposal of all packaging from site.

### 10. YOUR VISION BROUGHT TO LIFE
- Courtesy call from Hill Cross to check everything is 100%

# **OPTIONS** OUTER SHELL

### UNFINISHED

By far our most commonly selected back style, most likely because fixed seating is most frequently installed against a wall or cladding. The rear of the seating is left open and accessible, however once installed these unfinished areas are concealed. An unfinished back requires fewer raw materials and is generally the most cost effective option.

### UPHOLSTERED

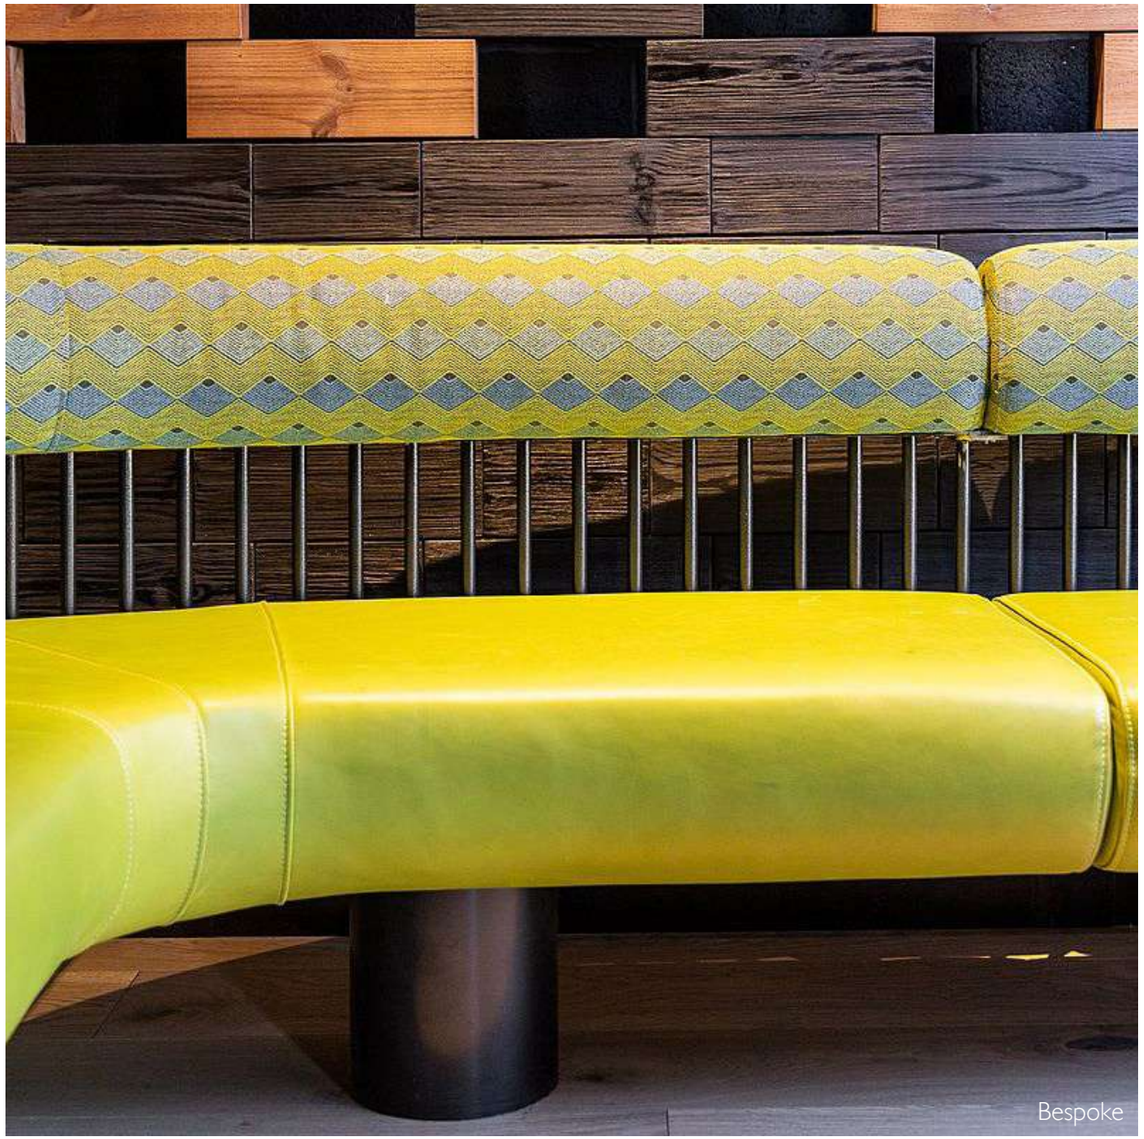

Often a preferred choice where settle style legs have been chosen. The upholstered back allows the seating to be placed freely within the venue, either against a wall or in the middle of the room creating a movable or modular peice. The upholstered back can match the the rest of the seating to creat a uniformed look, or contrast to add another level of detail.

### VENEERED

A veneered back would be selected in similar circumstances to the upholstered back options, however if you have characterful timber detailing running through your venue and wish for the seating to marry well with the environment, then a veneered back can be chosen and finished to a standard factory stain to match your design intent.

Bespoke

# **OPTIONS** BASES

**KICKBOARD**

A standard kickboard or plinth will more often than not be a stained timber veneer or laminate. Other options are available, including kick boards in blackened mild steel and character Oak or reclaimed timber.

**SETTLES**

Constructed from solid Oak, a settle style frame allows seating to be made freestanding and not fixed to one location within the venue. The Oak grain is visible below the upholstered part of the seating and can be finished in a stain of your choice. For outdoor use, we substitute Oak for Iroko which has greater durability, without compromising aesthetics.

**LEGS**

Our team are experienced in fitting a range of leg finishes, from simple round or square tapered legs to exquisitely turned ornate legs.

***Contact us about the bespoke options available, including metal and feature wooden frames.***

**HC 111** GREY

**DISCLAIMER**

All images used are for illustrative purposes only. The wood stain colours may vary and are an indicative of the quality and style of the product specification but may not represent the actual detail of the product as received.

# **OPTIONS** FINISHING

## STUDDING

Available in a number of different finishes, studding can add a touch of authenticity and vintage character to a banquette. Often it is used when arms are added for an extra touch of opulence or a contemporary finish.

## STITCH DETAIL

Below are a few examples of the most commonly requested stitch detailing we offer...

***Saddle Stitch*** - An overcasting stitch, made with a strip of leather. The spaced running stitch is often done in a contrasting shade or heavy thread along the edging of the banquette to produce a subtle design touch - hand finished to perfection.

***Top Stitch*** - Most commonly used along the edge of seating pads as it created a natural edge on the setting and provides a professional finish.

***Blind Stitch*** - Similar to the saddle stitch, however it does not include a spaced running stitch either side of the seam line, instead it is left stitch free with all sewing hidden behind the seam

***Single Stitch*** - Generally used in feature stitching (see overleaf), being the simplest of stitches allows the feature stitch pattern to stand out without being overwhelmed by the stitch lines.

Single Stitch

# **OPTIONS** FEATURE STITCHING

With feature stitching, the possibilities are vast and can add an extra level of detail to a project or venue. From patterns to text, your brand identity can be carried through a project with quirky little elements or details to draw the eye. Feature stitching can give you a truly unique piece of furniture.

If required, we can produce a test sample to help visualise the finished product. Contact us for more details and to discuss your specification

# OUR WORK EXAMPLES
