The designer

Tom Dixon (OBE). Born in 1959. Self-taught British Designer. Founder of the design brand "Tom Dixon" and Design Research Studio that specialises in high-end concept interiors, large scale installations and architectural design. Museums across the globe have awarded and acquired some of his work, including MoMA, NYC and Centre Georges Pompidou, Paris. With a commitment to innovation and a mission to revive the British furniture industry, he is inspired by the nation's unique heritage to create extraordinary products for everyday use.

The Industrial Landscape collection

London is the departure point for the collection – and for Tom Dixon a whole world of inspiration. Perhaps not the prettiest, nor the most glamorous, but certainly one of the most characterful cities in the world.

Gritty backdrops of railways, tunnels, of factories, workshops and warehouses. Materials so prevalent that they make a huge impact. Imperfect surfaces and materials make up the crumbling industrial landscape while the massive tidal River Thames splits the city in two, and new reflective glass towers begin to dominate the skyline.

There is a kind of beautiful pattern of time on a grimy city that has lived a few lives. As materials break, they are repaired creating a new pattern that has its own aesthetic; deconstructed bricks, patinated metal and the grey muddy water of the Thames. A series of patterns and textures that come straight from the building or the erosion process.

The Industrial Landscape collection reinterprets the rough, raw everyday surfaces of the city that are so familiar to Tom Dixon. Each of the seven designs is available as tiles, planks and broadloom and can be recoloured to meet your requirements.

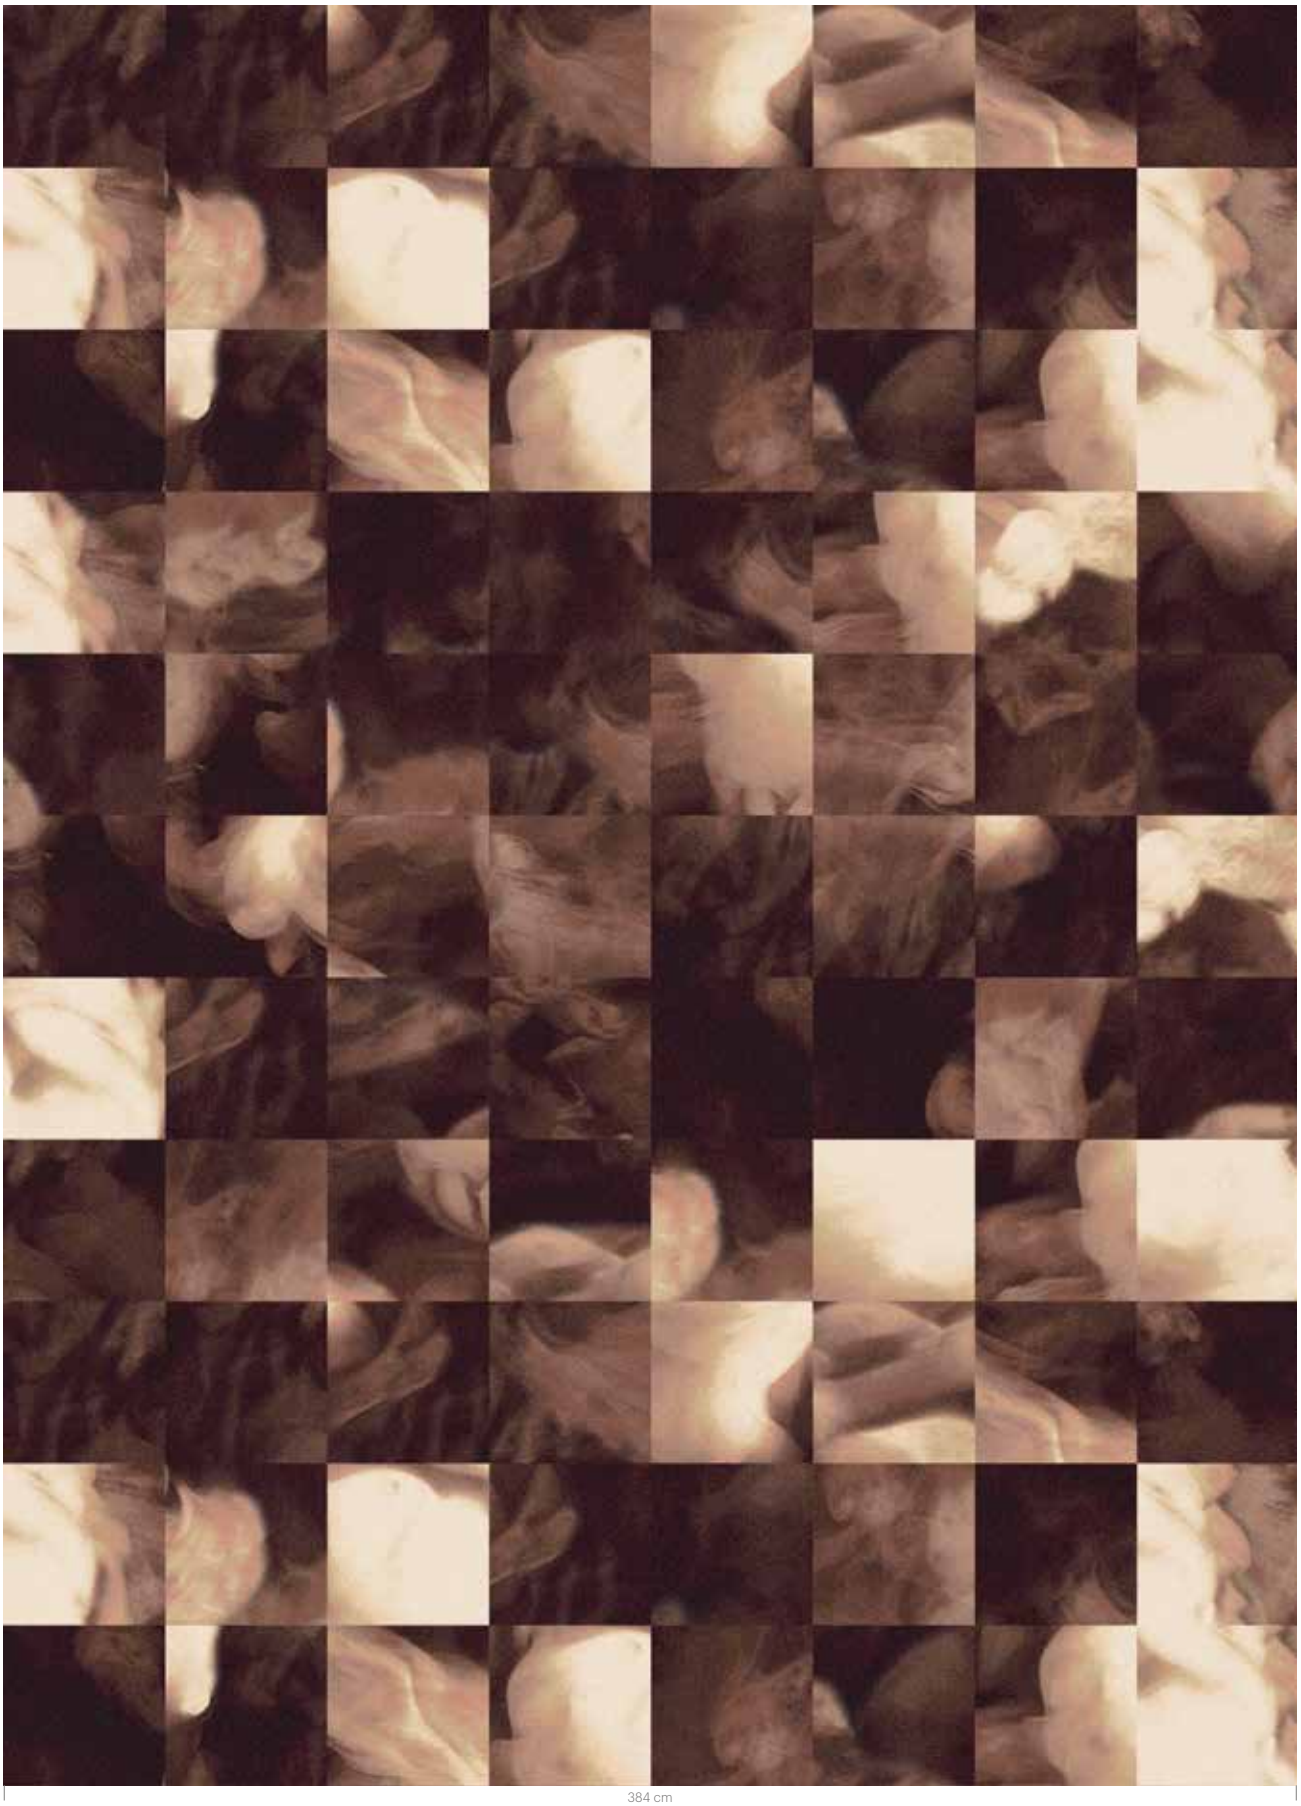

smoke

The coal-powered city with its rich industrial history, production and manufacture.

All the details

Technical specifications

The Industrial Landscape collection features seven design themes. Each of them is available as carpet tiles and planks as well as broadloom creating different expressions within the same design theme. Tiles, planks and broadloom can be mixed together or combined with other Ege Carpets collections to get a truly unique flooring solution for not only one room but also for projects with several spaces.

- 7 designs
- Recolour options (see page 45)
- 9 standard broadloom qualities (see specifications at egecarpets.com)
- No minimum order requirements for broadloom
- 6 standard qualities for 48x48 cm, 96x96 cm tiles and 24x96 cm planks (see specifications at egecarpets.com)
- Minimum order from 40 m^2 for tiles and planks
- Undisputed performance standard EN 1307
- Performance classification to fit any need; extra heavy use
- 24-hour sample service
- Dispatch within 2 weeks from receipt of order for broadloom and 48x48 cm tiles
- Dispatch within 3 weeks for 96x96 cm tiles and 24x96 cm planks

The green choice

All carpet tiles and planks from the Industrial Landscape collection have the patented Ecotrust felt backing. This is an innovative production technique turning used water bottles into a soft, yet strong and highly durable PET felt that also holds great acoustic performance. The Ecotrust backing is Cradle to Cradle Certified™ signifying that it is one of the most environmentally friendly tile backings on the market.

Combined with the Highline 1100, Loop or Carré face quality made of regenerated and regenerable ECONYL® yarns, the product is a 100% green choice. ECONYL® yarns are produced from mainly used fishing nets that are reborn as strong, hardwearing yarns for textile flooring.
