

Bedrooms designed with you in mind

renrayhealthcare.com

welcome to Renray

For the last five decades, customers have turned to Renray to supply high quality healthcare and medical furniture for their care facilities.

We manufacture and assemble all our healthcare furniture in our own purpose built factory in Winsford, Cheshire, as well as in Europe to British Standards. Our products are stylish and comfortable, designed with both you and your service users in mind.

Good design is at the heart of what we do, from chairs in a range of upholstery fabrics, tables in a range of finishes and accessible beds and mattresses. When it comes to soft furnishings, nobody does it quite like Renray. It's what we do day after day and it's this complete end to end solution that sets us apart.

Our Ranges

One of the many things we've learnt from listening to the needs and requirements of care home managers over the last 50 years is that one size does not fit all when it comes to furnishing their facilities.

In this brochure, you'll discover inspirational interiors in a range of styles. Ranges can be complemented with a choice of soft furnishings that transform rooms into comfortable, homely spaces. We have quite literally thousands of combinations of colours, fabrics and styles available, and our skilled designers can work closely with you to ensure that you get the look and feel that you want. We hope this brochure offers inspiration, but our interior specialists are also on hand to make recommendations if you're still unsure about what will work in your space.

For now, browse our sophisticated ranges and get in touch with a member of our team if we can help with your next project – we'll be happy to help.

For our Bed range See p48

Aspen

One of our most sumptuous ranges, Aspen is a collection of luxury wooden bedroom furniture with a sleek, modern feel. With T-bar handles, the stylish drawers and wardrobes are easily accessible, hard-wearing and minimalist. The high back of the Tuscany chair offers comfort and support for relaxing, while the Monza side chair fits perfectly beneath the free-standing four drawer dressing table. Personalise Aspen by choosing from a number of finishes and upholstery options.

Glendale

With a modern, clean aesthetic style, our Glendale range is ideal for those with discerning tastes. The straight lines and panelled door fronts offer a neat, crisp feel, while the smooth, curved brush steel handles give it a softer edge. Solidly built with a H-frame base, the six drawer dressing table, four drawer chest and double wardrobe are sturdy and substantial. A matching wall mirror and stylish headboard complete the look of this premium range.

Denver

Function and style go hand-in-hand when it comes to our Denver range, with soft, curved edges offering not only a unique look but no sharp corners to worry about. Its 22mm vinyl wrap tops mean there are a range of wood finishes to choose from, from deep, rich Walnut up to lighter, brighter Odessa Golden Oak. The Chelford side chair with arms can be upholstered in a range of fabrics, as can the sumptuous Kingsley high back chair.

Boston

Our Boston range offers a huge number of furniture pieces to suit any living space. Our lockable Boston bedside unit comes with either door and drawer or three drawers, offering ample room for secure storage. Brushed steel D-shaped handles adorn the beautifully designed chests, which come in either wide, three drawer or narrow and tall four drawer options to accommodate rooms of any size and shape. Our Blenheim high back chair offers a modern take on an old classic.

York

The country cottage feel of the York range make it a popular choice for those wishing to create a traditional ambience in their facility. With an oak and painted design, it doesn't compromise on style, and its round door knob handles make it different from anything else in our collection. The 18mm dual finish vinyl wrap tops and drawer fronts of this homely range, allow you to easily co-ordinate with your chosen soft furnishing schemes.

Albany

Simple straight lines and brushed steel D-shaped handles make the Albany range sophisticated and modern. Finished in Odessa Golden Oak, it'll fit in with your existing décor if an entire refurbishment isn't in your plan. In our affordable range, the Albany range is inexpensive without looking or feeling cheap. With a double wardrobe, dressing table, wing back chair, bedside unit and chest of drawers available, it's a stunningly simple option.

Dementia

With a growing number of specialised dementia care facilities being opened throughout the UK, Renray have developed a completely new range for people with dementia. A culmination of great design, technical excellence and quality production, this refreshingly different collection incorporates a number of unique features designed to make life a little easier with these functionally obvious products.

The important features and benefits of the ranges include:

- Vinyl wrapped with curved, smooth edges and corners for safety
- Easy wipe clean surfaces for infection control
- Wood grain that is plain and simple, not heavily patterned, so it doesn't cause confusion or concern (which can happen to some, but not all dementia sufferers)
- Contrasting, clearly visible easy to use handles (Boston)
- Option of viewing panels so items within them can be seen, to help with cognitive and visual impairment
- Stable and comfortable seating enabling residents to use for prolonged periods
- Subtle not dramatic patterns on fabrics (as strong patterns can cause concern to some, but not all, dementia sufferers)

PROFESSIONALLY MADE

Renray products are independently tested and manufactured in accordance with recognised British standards

Boston Dementia

Define Edges

Simple things can make life for someone with dementia a lot easier, such as contrast piping on the edge of seating or beds.

Wardrobes with flexible modular options. Available with open section or with perspex viewing panel, are designed to help those with cognitive and/or visual impairments.

Delaware

Shaker design is a timeless favourite, and our Delaware range harnesses this beauty. The scooped handles offer a modern twist, complementing the rounded corners perfectly. Panel inserts keep the Shaker look alive, which carries across the huge range of matching furniture. We think this looks best in the contemporary Odessa Golden Oak finish, though this can be tailored to personal taste. The Delaware range is suitable for both dementia and non-dementia users, too. Delaware is a fully FSC®-certified product.

Profiling Beds & Mattresses

Renray recognise how highly important it is for residents to be able to personalise their own room to try and recreate a home from home feeling. The Beds & Mattresses collection goes a long way to helping to achieve this and offers high levels of comfort, design and functionality – a proven formula for success.

PROFESSIONALLY MADE

Renray products are independently tested and manufactured in accordance with recognised British standards

Elite Profiling Bed
Innovative Design Solution

Personal Space

The Renray Elite electrical profiling bed range has been designed to incorporate the softer, more rounded aesthetic appeal of modern domestic furniture, complimenting existing schemes and delivering a coordinated, comfortable and homely feel.

The Elite range has been designed using Renray's extensive knowledge and experience of anthropometric data to produce a care bed that truly matches the ergonomic and clinical needs of your residents.

Elite Profiling Bed Range

Model E2000LK

The standard bed with side rail lock down providing a height range and bed width to suit the majority of residents.

Model E2060LK

All the features of the E2000L but with a lower egress height to assist with falls risk residents.

Model E2400LK

A 4ft wide bed for those residents that would like or need a more spacious lying surface for either comfort or clinical reasons.

Independently Tested

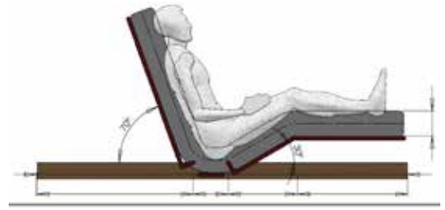

While it is possible for manufacturers to 'self certify', the complexity of the standard can lead to interpretation rather than strict compliance. To ensure that the Elite range is fully compliant, Renray beds are INDEPENDENTLY tested to IEC 60601-2-52:2009.

Advanced Profiling*

The 4 profiling sections of the Elite bed range mimic the movement of the client's natural pivot point (their hip joint), with the backrest and thigh section imitating the way tissue stretches as they move from a lying to a sitting position, reducing abdominal compression while seated. This offers major benefits over conventional profiling beds:

- Reduces risk of pressure ulcers and shear and friction
- Excellent postural support
- Better respiratory positioning
- Exceptional comfort

*Also applicable to Renray's Carer and Corus profiling bed

Side Rail Safety

An optional 'side rail lock down' facility allows senior staff to lock the side rails in the lowest position so that they cannot be used inappropriately.

Dementia Friendly

To help with this increasingly common debilitating, neurological and physical condition, the Elite bed range has a number of Dementia friendly features:

Aesthetics – compared to many care beds the Elite bed range 'looks normal' and matches room décor, causing less distress and anxiety.

Colour Contrast – 30 point Light Reflectance Values (LRVs) can be achieved by the contrast between the rubber 'bumper' beading and the head/foot end panels by defining the outer edges of the bed, reducing accidental contact and bruising.

Curves & Bumper – the rubber beading combined with the width and curvature of the head and foot end help reduce injury to residents and damage to the bed and room furnishings.

Carer Profiling Bed
An Effective Solution For Care

Enhanced Comfort and Support

The Carer profiling bed was specifically designed to perfectly match the ergonomic and clinical needs of your residents. With enhanced patient positioning and optimised mattress platform, the Carer reduces shear and friction when the bed is being adjusted, by correctly supporting the user throughout the profiling range and increasing comfort.

Dementia Friendly

- Simple and elegant design is in harmony with a care home setting
- Uniquely styled head and foot board design, enhancing patients' visual field, reducing the "enclosed feeling" that some beds generate
- Rounded corners for safety
- Appropriate height to prevent injury from falls
- Stable four point design as dementia users tend to use the bed as a mobility aid

Built in Safety

Accidental deaths involving profiling beds are usually associated with the incorrect use of side rails or incorrect side rails being fitted. The Carer bed range has unique fittings making it impossible to fit incorrect sides and ensuring compliance with the IEC 60601-2-52 bed standard.

The patented side rail locking system allows senior staff to lock the side rails in the lowest position so that they cannot be used inappropriately but are always available.

Wood Finishes
Please enquire for wood finish options on the Carer bed.

Product Code	CAR1000K Carer Low Height Profiling Bed	CAR2000K Carer Profiling Bed
Variable Height Range	195 to 600mm	195 to 700mm
Safe Working Load	180Kg (28 stone)	
Maximum Patient Weight	150Kg (23 stone)	
Mattress Platform Dimensions	1965 x 910mm	
Standard Bed Length x Width (External)	2207mm x 1040mm	
Bed Length Inc. Bed Extension (External)	2322mm	

Corus Low Profiling Bed
A Unique Approach To Bed Design

Reducing the Risk of Injury

The Renray Corus bed has a low height of 19.5cm, from mattress platform to floor, offering increased security for clients, allowing them a relaxed sleep and peace of mind, especially when combined with a falls mattress, significantly reducing injury from bed falls. However, carers can also simply raise the bed to a more suitable height when necessary for delivering care. The simple to use variable height allows greater independent movement and transfers.

Dementia Friendly Bed

- Uniquely styled head and foot board design, enhancing patients' visual field, reducing the "enclosed feeling" that some beds generate
- Rounded corners for safety
- Appropriate height to prevent injury from falls
- Stable four point design as dementia users tend to use the bed as a mobility aid
- 30 point Light Reflectance Values (LRVs) between the grey rounded corners and head and foot panels can be achieved, making it easy for the visually impaired to see the edge of the bed

Accessories

CORSSR - 3/4 Folding side rails - standard height accommodates mattresses up to 15cm deep*
CORESR - 3/4 Folding side rails - extra height accommodates mattresses up to 25cm deep*

Mattress Weight	10kg	11.5kg
Maximum user weight limit	120kg	120kg

Key Features

E3000, E4000, E5000 & E5400

- Pressure redistributing
- Turnable with monthly orientation
- Ultra two way stretch cover
- Concealed zip on 3 sides
- Hygienic, easy to clean and maintain
- Vapour permeable
- Water resistant
- Conforms to all bed profile positions
- Transverse-cut design conforms to body shape and reduces interface pressure and friction
- Channels within the foam allow greater air circulation which reduces skin macerations

E5000 & E5400 only

- Temperature sensitive Viscoelastic foam
- Conforms to body shape and reduces interface pressure

REVO Gel Infused Visco-Elastic top Layer foam with profiled front edge for reduced sear and improved comfort

Cover Material

- 200g PU coated woven 2 way stretch, knitted polyester
- Washable 80°
- Water vapour permeable 8%

Fire Retardancy

- Meets the required BS EN S97-1 1995, BS EN S97-2 1985, BS 6807 1996 Section 2 Ignition Sources 0, 1 and 5 in top position

Warranty

2 years on both the foam and the cover

Dynamic Mattress & Cushion Systems
The Next Generation of Care

Over the last 10 years Squirrel Medical has been developing air mattresses with improved features to better meet the changing demands of the Care Home sector.

Features Include:

- Improved exceptional pressure area care and comfort due to the ultra low profile
- Reduced mattress depth & stable lying surface to reduce the risk of falls
- Low profile of mattress ensures 22cm clearance from top of the mattress to top of the side rails is easily achieved
- All mattress systems come with a "Whisper Quiet" range of pumps with quick fit hose connector
- Improved infection control via a zip-off top cover

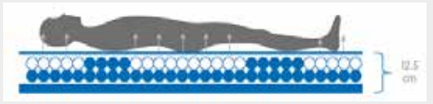

Diamond Mattress Replacement System – Very High Risk

Diamond is an active and dynamic low profile mattress replacement system providing the highest level of pressure area care and comfort.

- Effective in both the prevention and treatment of pressure ulcers, with minimal movement
- Suitable for High to Very High risk users
- Uses Ventilated "Stacked-cell" technology
- 29 narrow cells provide better support and improved profiling
- Ultra two way stretch top cover with a tough water-proof, non-slip base
- Easy to use and maintain

Key Features

- 12.5cm ultra-low profile, does not need side rail height extensions
- Stacked cell technology, giving the best possible pressure area care
- Whisper quiet pump for tranquil bedrooms
- No side rails height extensions required to comply with IEC 60601-2-52

Low profile mattress with Ventilated 'Stacked cell' Technology

Dormir Mattress Replacement System – High Risk

The Dormir is a dynamic hybrid mattress replacement system, which combines alternating air technology with the subtle use of foam.

Reducing the mattress depth to 13cms takes away the need for extra height sides whilst increasing the level of stability for a resident getting out of bed or transferring from a wheelchair. With a two way stretch top cover and innovative cell technology, the Dormir mattress delivers a high level of comfort.

Key Features

- Suitable for Medium to High Risk users
- Simple to operate and maintain
- 29 narrow cells provide better support and improved profiling
- Adjustable pressure setting for optimal patient comfort
- Whisper quiet motor does not disturb sleep
- Low profile of 13cms

Diamond & Dormir mattress ventilated 'Stacked cell' Technology

Whisper Quiet Pump

Aurora Dynamic Seating

The Aurora Seating System is designed to bring maximum flexibility of pressure area care to residents in the care home environment and is specifically sized to fit most arm chairs.

Key Features

- Supplied with or without its own pump
- Fits the pumps supplied with the Dormir MRS,
- 8 low profile transverse cells for greater seated stability
- "1 in 2" alternating cell pattern provides an effective therapy for the prevention and treatment of pressure ulcers
- Micro-Ventilated cells provide Micro Low Air Loss which helps reduce heat and moisture build-up
- 10 minute cycle time
- Completes the 24 hour care package
- PU Top Cover for reduced pressure peaks and improved infection control
- Non-slip base and security strap

Divan & Fixed Height Beds

Renray's range of divan and fixed height beds are stylish, sturdy and with a variety of wood finishes to choose from, they are the perfect for any bedroom setting.

Nautilus Mattress

An exceptional waterproof bed that is hypo-allergenic, antimicrobial and breathable. The mattress cover is 100% transfer printed polyester, impregnated and multi-coated with micro-porous polymers and flame retardant. This also makes the Nautilus very easy to clean; water-based and oil-based stains can be removed with household cleaning agents.

Abbey Single Bed (Base only) includes Head & Foot Board

Soft furnishings

When it comes to soft furnishings, nobody does it quite like Renray. Imagine a totally unique roomsetting, furnished with handmade Renray products and beautifully finished off with perfectly matched curtains, cushions and bedlinens - all designed, made and installed to your exact specification. It's what we do day after day and it's this complete end to end solution that sets us apart. Take a look at some of our soft furnishing ideas and if you have a special requirement, we're sure we can help.

A perfect start, a perfect finish

It all starts with the mood boards. Our interior designers work with you to create the look you're after and put together the scheme you require. With literally thousands of combinations of colours, fabrics and styles, your scheme will be unique to you. Our skilled designers and estimators then go on site to take precise measurements and planning begins. We'll then talk you through your design package making sure it meets your expectations and that there are no surprises at the end, keeping you informed every step of the way.

We then set to work, always in sync with your agreed deadlines, with any unforeseen issues being reported and resolved collaboratively. The process is complete when our own national team of fitters carefully install everything to your complete satisfaction. It is this complete 'start to finish' solution that really sets Renray apart.

1

Step 1: Bespoke Design

2

Step 2: Site measuring and estimation

3

Step 3: Presenting the schemes

4

Step 4: Production and make up

5

Step 5: Fitting and installation

6

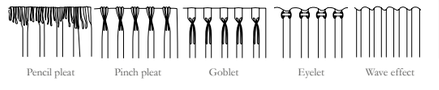

Step 6: Finished to perfection

Frame your room with Renray...

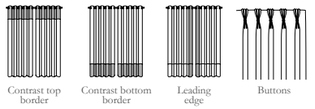

Our extensive range of made to order soft furnishings, curtains and blinds means we can provide the finishing touches to complement any room.

Options

Curtains, valances:
Straight, shaped, banded, pinch pleat, box pleat, goblet pleat, swags and tails, tiebacks, cubicle curtains

Blinds:
Roman, roller, vertical and venetian

Pelmets:
Upholstered, straight or shaped variety of cushions and bedding

Luxury options available:
Upholstered pelmets, braided and handstitched pelmets and hand stitched interlined curtains.

Design, innovation, performance & installation...

Renray offer a wide range of made-to-order curtains and blinds to complement any room. We offer a complete measuring, design and fitting service. We work with all major fabric designers and are exposed to a vast range of fabrics ranging from traditional elegance to boutique chic - there is something for everyone.

Curtain Tracks
As standard we use a white aluminium curtain track with siliconised gliders (gliders run on the underside of the track to minimise ingress of dust and dirt)

Other options:
Electric track – switch or infra red remote control operated
Anti-ligature track – available with pop out gliders or snap hooks if required

Cubicle Tracks
We use a white aluminium ceiling suspended system as standard, which uses roller glides with integral stainless steel hooks. Available with anti-ligature brackets if required

Curtain Poles
Wooden curtain poles in 28mm, 35mm and 45mm diameters
Metal curtain poles in 19mm, 28mm, 35mm and 50mm diameters

Quotation Process
For new builds and cubicle arrangements quotations can be made using floor plans and elevations/window schedules. For existing buildings quotations, we can arrange for a no obligation site survey to be carried out by one of our Area Sales Managers or National Estimators

Fitting
We operate a full fitting service carried out nationwide by our own teams of uniformed, professional fitters

Fabrics
We promote the use of inherently flame retardant polyester fabrics that are:

- Guaranteed to be flame retardant for the lifetime of the product
- Machine washable
- Minimal shrinkage during washing
- Minimal care required - little or no ironing required after laundering

Please note: Fabric samples can be sent upon request

Quality comes as standard...
- 100% fullness
- Mitred corners
- 220gram (standard weight) other options are available
- Blackout/sateen/ polyester lining
- Blind hems Weighted joints and corners

Bedding & Cushions

Why not finish your room with Renray?

Renray are leaders in soft furnishings for healthcare environments. Our versatile outlook means we can offer a range of styles with complementary fabrics and soft furnishing accessories.

From traditional elegance to contemporary chic we are able to enhance any room.

Our extensive range of soft furnishings means we can provide the finishing touch to make the difference. We manufacture and supply all ranges of sheets, quilted throws, bed runners, flatsheets, bedspreads, cushions, pillow cases, duvet covers and more...

Innovative Fabrics

Why not add a touch of glamour with Renray?

We work with all the major fabric suppliers in the UK to ensure you receive the finest choice of performance fabrics.

As part of Renray's commitment to Health & Safety we recommend all items of furniture 800/1000mm or over in height should be attached to a wall. This includes, but is not restricted to, wardrobes and chests of drawers.

It is not the responsibility of Renray Healthcare to fix items to walls unless a pre agreed cost has been agreed.

Technical Information

Renray furniture and chairs are robust, but don't just take our word for it as we independently test our products and have the certificates to prove it, so you can order with absolute confidence.

Antibacterial coating on all wood finishes for hygiene protection

Wooden frames are supplied with an antibacterial coating. This coating incorporates an active agent which prevents bacteria surviving when in contact with the coated surface.

Independent laboratory tests prove that antibacterial coated products have a 99% kill rate of bacteria within a 24 hour period. Continuing to kill bacteria for the life of the coated surface

High performance fabrics

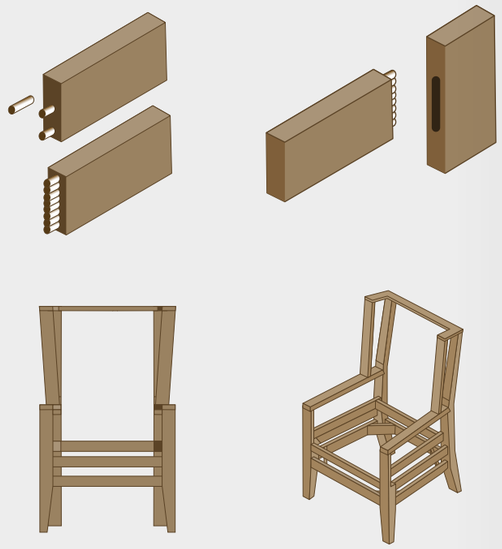

Amongst our extensive range of fabrics we also offer a number of anti-microbial options that are effective against MRSA as well as E.coli, Listeria, Salmonella, Legionella and other similar bacteria.

These include

- Anti-microbial fabric
- Anti-microbial impervious fabric
- Intervene fabric, which is waterproof and has added stain repellent and anti-microbial properties

Mortice and tenon joints

Mortice and tenon joints are on all our chairs. Renray's contact area on a joint is 283% greater than a standard dowel joint"

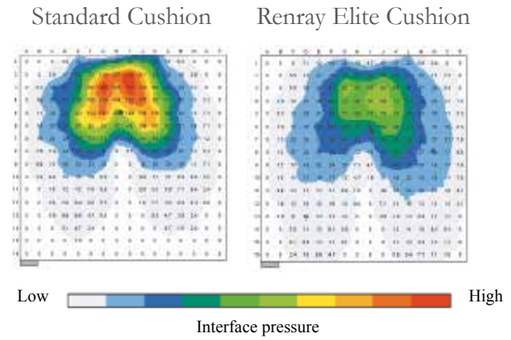

Are you sitting comfortably?

We are famous for our technical and clinical expertise which ensures that our products not only look good, but are specially designed for comfort, durability and long term performance.

To ensure good posture, pressure area care, as well as comfort, it is important to have a correctly fitted chair and cushion.

Anthropometric Dimensions

Humans vary significantly in size and build. In some situations, it is sufficient to design for the smallest or largest likely dimension. In other situations, adjustable benches, chairs or devices are required for the full range of people. Renray are experts in designing products in accordance with the latest scientific evidence so we don't just create comfort, we build it in from day one and have the clinical and technical expertise to back it up. And this sets us apart from the rest.

The Renray Elite cushion has been specially formulated to reduce concentrations ofpressure on the patient while seated, resulting in additional comfort levels.

The Renray guide to good seating and posture

Correct seating position and chair dimensions will provide: A good sitting posture, important for activities of daily living and normal body functions e.g. respiration. Good pressure area care, by maximising the surface over which weight is carried, thereby reducing pressure and freedom for independent movement and postural changes.

Seat too wide

Offers no support or stability, the body tends to lean to one side, putting pressure on ischial tuberosities

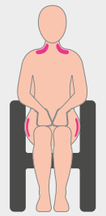

Seat too low

An individual's body weight is supported on a small area, leading to high pressures under the coccyx and buttocks. Feet pushed forward for stability increases heel pressure.

Seat too narrow

Risk of pressure damage to Trochanters. Difficult to get in and out of the chair due to limited movement.

Seat too high

Difficult to get into and no support for the feet, leading to ankle deformities and restriction of blood flow at the back on the thigh. Heels are at risk when the patient shuffles forward for comfort.

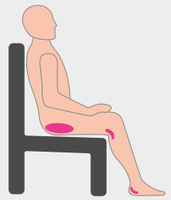

Seat too short

The body weight is supported on a small area. The feet are used for balance and posture, leading to high pressures and discomfort, especially under the thigh.

Seat too long

Causes high pressures, especially on the back of the knees and sacrum due to limited knee and ankle flexion, leading to poor posture.

Renray Credentials

When you work with Renray, you're in very good company and here's why...

Certifications

When ordering any Renray product you have the peace of mind of knowing that we have been audited and accredited and have the necessary standards and business controls in place. These are the professional business standards when dealing with at risk and vulnerable clients.

ISO 9001 – Quality Management System

ISO 14001 – Environmental Management System

ISO 18001 – Health & Safety Management System

FSC® – Forestry Stewardship Council®

Our policy is to provide and maintain working practices that have the least detrimental effect on the global environment. We operate a lean manufacturing process whereby all our products are made to order by our highly skilled workforce. Look out for our FSC®-certified products.

CHAS – The Contractors Health & Safety Assessment Scheme

BHTA – British Healthcare Trades Association

BCFA – British Contract Furnishing Association

Professionally made

With over 50 years experience behind us, our craftsmen consistently produce quality furniture and interiors from our own factories based in the UK and in Europe. Together these total over 100,000 sq ft of production space.

Renray products are independently tested and manufactured in accordance with recognised British standards.

These nationally recognised standards include:

- BS 5852 Part 2, Crib 5 Flame Retardancy
- BS EN 16139:2013 Strength, Durability & Safety. Non-domestic Seating
- BS EN 15372:2008 Strength, Durability & Seating. Non-domestic tables
- BS EN 16121:2013 Non-domestic storage. Safety, Strength, Durability & Stability
- BS EN 7176:2007 Resistance to Ignition
- BS 5867-2 type B & C Fabric for curtains, drapes & blinds
- BS 7177:2008 Resistance against ignition of mattresses, mattress pads, divans and bed bases

Carefully Installed

Renray have an in-house logistics team who co-ordinate and manage a weekly delivery service to all areas of the UK and Ireland, from our 38 swap body fleet.

Products are delivered by our own team of experienced DBS checked, uniformed drivers.

Free room placement, unpacking and packaging removal.

Highly trained staff with many years experience in the careful treatment of installing turnkey solutions.
