Quality That Lasts

As with all Humanscale products, Float Gather comes with an industry-leading warranty. All components are tested well beyond standard to ensure they look and perform as well after a decade of heavy use as they do on day one.

Formaldehyde-Free

Formaldehyde, which is considered a carcinogen by the FDA and EPA, is present in most worksurfaces. We have gone to great lengths to produce safer and healthier worksurfaces, removing formaldehyde from the core, glue, and edge banding.

*Trace amounts of formaldehyde naturally occur in wood. This claim does not apply to laminate options, as no suppliers of laminate top surface material offer formaldehyde-free options. However, all our worksurfaces have been lab tested to ensure no formaldehyde VOCs off-gas.

Offset Leg Design

Float Mini's offset leg maximises stability while providing more usable space beneath the desk. Unlike a centred base, the offset base allows the desk column to be positioned closer to the edge, which not only improves legroom but also makes it easier to place the desk against walls or underneath side tables.
